H&M’s annual accounts and consolidated accounts for the financial year 2015/2016 comprise pages 72-102.
Fashion and design — our passion

With our brands we want to inspire fashion fans around the world to dress their own personal style. We are driven by a desire to always create the best offering for our customers – and to do so in a sustainable way.

We love fashion and design. Our unique brands make us one of the world’s leading fashion companies. With 4,351 stores in 64 markets and e-commerce in 35 H&M markets, we have a global store network and a strong digital presence. We are driven by a desire to always create the best offering and the best experience for our customers – and to do so in a sustainable way. With a vision to lead the change towards a circular, fair and equal fashion industry, we use our size and our position to drive positive change for people and the environment throughout the value chain. The ambition for our sustainability work is based on our company’s long-term approach and values-driven way of working. The H&M group’s shared values have existed ever since the very first store opened in 1947 and are a large part of what our company is and stands for. Our values help create an open, dynamic and down-to-earth company culture where anything is possible. Today there are more than 161,000 of us around the world. Together we are the H&M group.
Our unique brands

The H&M group includes several clearly defined fashion brands, each with its own unique identity.

We offer fashion from the brands H&M, COS, Monki, Weekday, & Other Stories and Cheap Monday, as well as homeware from H&M Home. Together our brands provide a wide and varied range, enabling us to offer our customers many different styles and trends. All our brands share the same passion for fashion and quality, a drive to give customers the best value for money and an ambition to dress customers in a sustainable way.

4,351 stores in 64 markets and e-commerce in 35 H&M markets.

Our goal is for 100 percent of the cotton in our ranges to come from sustainable sources by 2020, which includes cotton that is either organic, recycled or certified by the Better Cotton Initiative (BCI).
Sustainability in everything we do

We want to contribute to positive development in society. Our growth creates job opportunities and our size gives us a unique reach and ability to contribute to positive change for people and the environment throughout the value chain. Along with innovators, scientists, trade unions, suppliers and other stakeholders, we work for a sustainable future. Our vision is to lead the change towards a circular, fair and equal fashion industry. We are pushing for fair working conditions and greater transparency.

The H&M group is one of the world’s largest users of organic cotton, recycled polyester and lyocell. Thanks to the commitment of our customers and employees, our global garment collecting contributes to increased recycling and reduced environmental impact. Responsible use of water, chemicals and energy is important to us. Even as we grow, we are reducing the greenhouse gas emissions from our own operations – mainly through switching to renewable electricity.

96% of the electricity we used in 2016 was renewable.

Our value chain

Our value chain is made up of every stage from idea to customer. We have a circular approach and sustainability is an integral part of our business. The collections are created by our own designers, pattern makers and buyers, while manufacturing is outsourced to independent suppliers. We have no middlemen; we always strive to buy the right product from the right market, to have effective logistics and to be cost-conscious in every part of the business. Flexible assortment planning and efficient distribution ensure that both the latest trends and timeless classics can always be found in our stores and online – at the best price.

15,888 tonnes of textiles were collected in 2016 for reuse and recycling.
In 2016 we opened 427 new stores net. H&M added three new store markets – Puerto Rico, Cyprus and New Zealand – as well as 11 new online markets. In the light of the shift in our industry towards an ever growing online market and digitalisation, the H&M group’s growth target has been rephrased. Our previous target of increasing the number of stores by 10 to 15 percent per year will instead become a sales target that includes both stores and online sales. The new growth target which applies for 2017 and going forward is that the H&M group’s sales shall increase by 10 to 15 percent in local currencies per year with continued high profitability. In 2017 a net addition of approximately 430 new stores is planned. The new markets for H&M stores will be Kazakhstan, Colombia, Iceland, Vietnam and Georgia. Six new H&M online markets are planned: Turkey, Taiwan, Hong Kong, Macau, Singapore and Malaysia. Of the new stores in 2017, approximately 70 to 80 will consist of stores for our other brands. H&M Home will also continue its rapid expansion.

The H&M group is guided by strong shared values.
Strong digital presence and global store network create new opportunities

The H&M group’s strong expansion continues. A new growth target reflects the shift to a world in which the physical and the digital shopping experience is increasingly integrated, and where being close to the customers is becoming ever more important.

Together 161,000 employees make the H&M group’s customer offering available to people who love fashion the world over. In 2016 the expansion of the group’s brands continued, both in stores and online.

How would you describe the past year?
– 2016 was an eventful year with many positive things – but also challenges, both for us and for the industry. We opened 427 stores net worldwide and for H&M we added three new store markets, as well as rolling out H&M’s online store to 11 more markets. During the year we were able to welcome more than 13,000 new employees globally, and I would like to thank all employees of the group for their amazing commitment this year.

Sales including VAT increased to SEK 223 billion, which is the H&M group’s highest annual turnover to date. What is your view on how sales developed?
– Our sales increased by 7 percent in local currencies, and although sales for the year were our highest to date, the increase was not as large as planned. This in turn led to increased mark-downs which, combined with the fact that a strong US dollar made our purchases more expensive, had a negative impact on our profit development for the full year. But we saw an improvement in profits in the fourth quarter.

In recent years H&M has rapidly rolled out e-commerce, which is now available in 35 markets. How did the online business of the H&M group develop in 2016?
– For our industry, 2016 was characterised by the continued shift towards an ever growing online market and increased digitalisation. We are very pleased that our online business developed very well for H&M and for our other brands, both as regards sales and profitability. We took further market share from an already high level, which we see as clear proof that the investments in our online business have been successful.

Can you tell us more about the development of COS and the other newer fashion brands in the group?
– COS, & Other Stories, Monki, Weekday and H&M Home all had strong online sales growth as well as very good store sales. We are pleased to see that the long-term investments that we are making in new brands, and which are appreciated by customers, are also starting to bear fruit.

H&M has a global presence, with stores in 64 markets. How did the markets differ in terms of sales at H&M stores in 2016?
– Sales developed well for H&M in a number of our well-established markets such as Sweden, the other Scandinavian countries, Russia, Turkey and Canada. We are also pleased with sales in our newer markets such as India, Australia, South Africa, Mexico, Chile and Peru.

– If we look at fashion retail in general, 2016 was at the same time a challenging year in which various external factors – including geopolitical events – had a negative impact on retail trade in many markets. This was particularly visible in France, Germany, Switzerland and Italy, but also in the US and China. Since these are markets that represent a large share of our sales, it also had a great impact on how our sales developed overall. But during the year we also identified things that we could have done better in various parts of our customer offering, the store experience and the supply chain, and we are now working methodically to improve these.

What are you doing to meet the future and the rapid shift that is underway in the retail industry towards more and more online shopping?
– We have a highly developed online business model and today our online sales already make up a significant share of our total sales in several markets. We are in an exciting development phase and have been investing in digitalisation and infrastructure for the past few years, prioritising areas such as the omni-channel offering, the supply chain and advanced analytics. The investments we are making in these areas ensure that we are well positioned for continued long-term and profitable growth, which also builds on our strong expansion both through new stores and through new online markets.

What will these investments bring for customers?
– The customer is at the centre of everything we do. We have a clear omni-channel strategy in which we are integrating the digital and physical worlds, and we are doing that in order to offer customers a more seamless shopping experience. This includes online purchases and returns in stores, click & collect, mobile payments, developing the customer club and using mobile devices in stores for increased
service. We are upgrading our supply chain to make it even faster and more flexible – which includes investments in technology, such as RFID and automated warehouses. We are also adding new delivery options for customers – such as next day delivery, which we now offer in five markets, and we have also started offering time-slot deliveries in Japan. We see advanced analytics as providing important support for our operations, and the algorithms we have started to use will contribute to improvements in everything from assortment planning to logistics and sales.

You have also rephrased the H&M group’s growth target. What does the new target involve?

– In the light of our current development phase, it was only natural for us to rephrase our growth target. This means that our previous target of increasing the number of stores by 10 to 15 percent per year is instead becoming a sales target that includes both stores and online sales. Our new target, which will apply for 2017 and going forward, is for the H&M group’s sales to increase by 10 to 15 percent in local currencies per year with continued high profitability.

What are the expansion plans for the stores in the future, given that e-commerce is growing more and more and the sales channels are becoming increasingly integrated?

– Today we have a strong store portfolio with more than 4,300 stores, which gives us a unique proximity to our customers, and being close to the customers is becoming even more important in a world where the physical and the digital experience becomes increasingly integrated. The stores that we are opening have very favourable and flexible leases, are in good locations and are profitable with a short payback period. In those circumstances, it is natural for us to continue expanding through physical stores too. In 2017 we plan to open around 430 new stores net. With H&M we will be entering five new store markets – Kazakhstan, Colombia, Iceland, Vietnam and Georgia – and six new online markets – Turkey, Taiwan, Hong Kong, Macau, Singapore and Malaysia. Alongside opening new stores, we are constantly reviewing the existing store portfolio to make sure that we have the optimal mix of brands, space and number of stores in each market. It will lead to some re-locations, the adding of new store space and also closures. Most of the new stores that we open in 2017 will be H&M stores.

What are your expansion plans for the other brands in the group?

– Around 70 to 80 of the new stores in 2017 will consist of our other brands. H&M Home is also developing very well, and so going forward we will be opening standalone H&M Home stores and profiling H&M Home even more as an individual brand.

In 2016 you also established a new sustainability strategy, in which you raise your ambitions further in order to drive long-lasting positive change in the fashion industry. Why is sustainability so important to the H&M group?

– We have always worked on making fashion available to many. The idea is that everyone who enjoys fashion should be equally able to dress sustainably. The reason that sustainability is so important to us is also because we have a long-term approach and a values-driven way of working. The world’s population is growing, but our planet has finite resources – and to be able to meet the needs of current and future generations, it is commercially vital for us to have a sustainable supply of materials and stable sourcing markets where people work in good conditions. With our size we can create large-scale demand for sustainable materials and renewable electricity, we can stimulate innovation for a circular use of resources and we can drive structural changes in the fashion industry. If we can also lead the way in diversity and transparency, we believe that it will create loyalty among both employees and customers – which in turn builds an even stronger company.

A new year has begun. How do you see the future and 2017?

– I am optimistic about the future. We have fantastically capable, committed employees and we have a corporate culture that allows us to keep developing and that has been our formula for success since the start. In 2017 we are looking forward to delivering strong collections and customer experiences, and also to launching one or two new brands. All this, combined with the improvements that we are working on and our investments in the omni-channel offering, the supply chain and advanced analytics, makes us positive towards our opportunities for reaching our newly rephrased growth target, both in 2017 and going forward.

Karl-Johan Persson, CEO
H & M Hennes & Mauritz AB
Highlights of the year

2016 was yet another eventful year for the H&M group, with stores opening in fantastic locations around the world and several new online markets. It was also a year of inspiring partnerships and exciting innovations on the way to the fashion of the future.

JANUARY

H&M MOVES UP THE INDEX OF THE WORLD’s MOST SUSTAINABLE CORPORATIONS

H&M climbed to 20th from 75th place in research company Corporate Knights’ annual index of the Global 100 Most Sustainable Corporations in the World. H&M was also the only speciality retailer to be ranked in the prestigious index.

FEBRUARY

COS CONTINUES TO EXPAND

The first COS store in the Czech Republic opened at Parizska 23 in Prague and was very well received. Later in the year Romania and Latvia also became new COS markets, making a total of 33 markets.

GLOBAL CHANGE AWARD

Textiles from citrus juice by-products, polyester-recycling microbes and an online marketplace for textile leftovers were three of the five innovations to win the Global Change Award 2015. The annual competition started by the H&M Foundation aims to spur innovations to close the loop for fashion. At an award ceremony in Stockholm in 2016 the winners shared EUR 1 million, along with access to an innovation accelerator run by the H&M Foundation, Accenture and KTH Royal Institute of Technology in Stockholm.
MARCH

H&M STUDIO SHOWS DIVERSITY IN PARIS
H&M’s show at Paris Fashion Week breathed feminine strength and individuality. Amber Valletta, Ashley Graham, Soo Joo Park, Hari Nef and others modelled the Studio A/W 2016 collection to more than 600 guests at the historie Bourse de Commerce, with a global audience watching live at studio.hm.com.

WWF AND H&M IN GLOBAL PARTNERSHIP
H&M and WWF World Wide Fund for Nature began a five-year global partnership that builds on an earlier three-year partnership on water stewardship. The new partnership includes climate action and strategic dialogue on sustainability challenges in the fashion industry, such as circularity and future materials.

H&M ONLINE IN 11 NEW MARKETS
In 2016 H&M’s online store opened in 11 new markets – Slovenia, Croatia, Estonia, Latvia, Lithuania, Luxembourg and Ireland in March, Japan and Greece in April, and Canada and South Korea in October. At the end of the year customers in 35 markets could shop online at H&M.

APRIL

ARTISTIC PIECES IN SUSTAINABLE MATERIALS
Conscious Exclusive is a recurring H&M collection of glamorous, well thought-out pieces in innovative, sustainable materials. In spring 2016 H&M collaborated with Musée des Arts Décoratifs in Paris, drawing inspiration from its collections for artistically sophisticated garments in materials such as organic silk, recycled linen and Tencel®. Accessories included earrings made of Denimite, a hard material made from recycled denim. The collection was launched to coincide with the opening of the museum’s exhibition “Fashion Forward – 300 Years of Fashion”.

NEW LIFE FOR OLD CLOTHES
Since 2013 H&M stores all over the world have collected old clothing for reuse and recycling. To encourage even more people to use resources responsibly, H&M organised World Recycle Week. Customers around the world brought in 1,100 tonnes of clothing in a single week. The initiative was part of H&M’s longer-term goal to close the loop for fashion.

MAY

UNIQUE H&M DESIGNS AT THE MET GALA
For the second year running H&M’s design team created pieces for celebrities attending the Metropolitan Museum of Art Costume Institute Benefit in New York. Inspired by the theme of this year’s exhibition “Manus x Machina: Fashion in an Age of Technology”, the design team at H&M used handcrafted traditions and cutting-edge techniques and materials to create individual looks.

TRANSAPARENCY INDEX GIVES H&M TOP RATING
H&M sees transparency and traceability as important tools in the development towards a more sustainable textile industry. The Fashion Transparency Index placed H&M among the top three when ranking how open the world’s 40 largest fashion corporations are with their production. The index was created by Ethical Consumer and Fashion Revolution.
JUNE

PUERTO RICO
NEW H&M MARKET
H&M’s first store in Puerto Rico opened in San Juan, in The Mall of San Juan, and was enthusiastically received by customers. September saw the opening of a further store, this time in the Plaza del Sol mall in Bayamon, which was also very well received.

JULY

FOR EVERY VICTORY
In summer 2016 H&M celebrated the life-changing power of personal victories with the trendy and functional sports collection For Every Victory. The campaign was fronted by inspiring personalities who have all achieved their own victories, whether in sport or through life experiences.

AUGUST

SWEDISH OLYMPIC AND PARALYMPIC ATHLETES WEAR H&M
H&M had the honour of dressing the Swedish teams for the summer Olympics and Paralympics in Rio de Janeiro, Brazil. Created in collaboration with various athletes taking part, the collections included items for the ceremonies, awards and training as well as clothes to wear in the Olympic village. For the first time, H&M also designed competition wear for a select number of sports.

OCTOBER

FIRST H&M STORE IN NEW ZEALAND
H&M’s first store in New Zealand opened in the Sylvia Park Shopping Centre in Auckland. More than 1,000 enthusiastic customers lined up to be the first to experience the store and buy H&M’s collections.

SEPTEMBER

H&M OPENS IN CYPRUS
Cyprus became a new market for H&M with the opening of the first store in Nicosia. More than 1,000 keen customers gathered outside the store on Ledra Street ahead of the opening.

FRAMEWORK AGREEMENT MADE PERMANENT
Cooperation, collective bargaining and a well-functioning dialogue between employers and employees in the textile industry are prerequisites for improving working conditions and achieving stable production markets. To drive this forward, in 2015 H&M signed an agreement with global trade union IndustriALL and Swedish union IF Metall. Positive results during the first year, including peaceful conflict resolution, led to the global agreement being made permanent in 2016.
MONKI OPENS IN VIENNA
Monki represents its own world of storytelling and colourful graphic design. In 2016, the brand opened its first store in Austria, at Mariahilfer Strasse 52 in Vienna. The store was very well received by customers, who could already shop online at monki.com.

RECYCLED FIBRES IN AUTUMN JEANS
The denim collection Close the Loop offered new interpretations of classic denim for men, women and children. Materials used for the collection’s jeans, shirts and jackets included recycled cotton and wool. Returning recovered fibres to the loop means natural resources can be used more sustainably.

SUSTAINABLE LEADERSHIP AWARD
H&M’s CEO Karl-Johan Persson received the Sustainable Leadership award for 2016 from NMC The Swedish Association for Sustainable Business. He won the award for “inspiring and challenging the whole fashion industry by addressing complex sustainability issues, with the goal of achieving long-term change”. NMC particularly mentioned the way H&M is driving structural change in order to improve working conditions and close the loop for resources.

NOVEMBER
KENZO X H&M
H&M’s 2016 designer collaboration with French fashion house KENZO was infused with individuality, vivid colours and playful energy. KENZO has Japanese origins and is known for its bold prints and ability to mix luxury fashion with urban streetwear in a youthful, universal way. Exclusive pieces and accessories for men and women resulted in a fantastic reception for the collection.

& OTHER STORIES OPENS IN NEW LOCATIONS
& Other Stories opened in several new locations during the year, with all the stores being very well received. In November the fashion brand opened its first store in Poland, at the Galeria Mokotów in Warsaw.

H&M HOME INSPIRES
With the opening of H&M’s biggest store in Asia, customers were also introduced to H&M Home – a whole department of inspiring homewares in the new flagship store on Hanzhong Street in the Ximending shopping district in Taipei. H&M Home is opening in more and more H&M markets and offers the latest products, trends and interior inspiration for the living room, kitchen, bedroom, bathroom and children’s room.

H&M DESIGN AWARD
In November Richard Quinn won the H&M Design Award 2017. A graduate of Central Saint Martins in London, 26-year-old Richard Quinn was selected from eight finalists for his unique vision for the future of fashion. The jury was made up of international fashion experts led by H&M’s creative advisor Ann-Sofie Johansson. Richard Quinn receives a one-year mentorship from H&M, a prize of EUR 50,000 and the chance to sell pieces from his collection in selected H&M stores in autumn 2017.
Fashion for all

With several brands and concepts, the H&M group offers a wide and varied range of inspiring fashion. The collections include everything from the latest trends to timeless classics, so that customers all over the world can dress their own personal style.

The H&M group offers fashion from the brands H&M, & Other Stories, COS, Monki, Weekday and Cheap Monday, as well as homeware from H&M Home. All the brands are clearly defined with their own unique identity and complement each other well. They all share the same passion for fashion and the ambition to dress customers in a sustainable way.

Together, the H&M group brands offer a wide variety of styles at various price points. The collections have everything from the latest trends to timeless classics. All the brands strive to give customers the best value for money.

The customer offering is for anyone who loves fashion, wherever they are in the world. H&M has stores on six continents, while Monki, COS, & Other Stories, Weekday and Cheap Monday are also internationally established brands. All have their own stores and offer online shopping in a large number of markets.

Read more about H&M and some of its many different concepts on pages 22–27, followed by H&M Home on page 28. & Other Stories, Cheap Monday, COS, Monki and Weekday are presented on pages 30–35.
H&M’s business concept is to offer fashion and quality at the best price in a sustainable way. Stores around the world and online offer fashion fans everything from the latest trends to lasting classics that can be worn season after season. With collections for women, men, teenagers, children and babies, H&M’s product range also includes sportswear, underwear, cosmetics, accessories and shoes, as well as homeware from H&M Home.

H&M is constantly inspired by the diversity of its customers. With a global customer base, influences come from every corner of the world. Anything from travel, films and art exhibitions to trend seminars, fashion shows and street style can give rise to new ideas. This diversity is reflected in the creative process. Designers, buyers and pattern makers are some of the many roles working together to create new collections. Everyone on the team is equally important. Colleagues with different knowledge, backgrounds and experience can all contribute their own ideas and fresh perspectives.
The diversity of H&M’s collections lets customers explore their own personal style. Garments that can be combined in lots of different ways and enjoyed over many seasons also extend the fashion life cycle. Sustainability is of great importance to today’s conscious customers and H&M strives to create clothes that will have a long life, in materials that can be recycled. The long-term aim is a circular use of resources, and this is reflected in the choice of materials among other things. Sustainable materials such as organic cotton, recycled polyester and recycled wool make up an increasing part of H&M’s product range.

“H&M’s business concept is to offer fashion and quality at the best price in a sustainable way.”
LADIES Latest trends for the season, reinterpreted classics and stylish cuts – H&M’s womenswear has fashion for every style and occasion.
OUR BRANDS – H&M

MEN Everything for the modern man’s wardrobe – from tailored suits and the key pieces of the season to casual everyday wear.

DIVIDED The latest fashion, where urban street style meets romantic influences – for a personal look with extra attitude.

KIDS Charming new styles and playful favourites for children of all ages – with a focus on function, safety and quality.
DENIM Jeans are a key item in the fashion wardrobe. A wide range of different styles and washes make it easy to find the perfect denim look – for him or her, and for all ages.

UNDERWEAR The women’s range offers everything from bras, briefs, bodies and shapewear in the season’s latest colours and patterns to favourite basics in soft cotton. The men’s selection includes a wide range of shorts and briefs, socks and loungewear.

SPORT Sports collections for women, men and children. Smart pieces in quick-drying materials provide the perfect combination of fashion and function. The collections include wear and accessories for a number of activities – from running to yoga and training outdoors as well as at the gym.
BEAUTY H&M’s wide-ranging, high quality beauty concept was launched in 2015 and now forms a natural part of H&M’s fashion offering. H&M Beauty has make-up in all the colours of the season as well as hair styling, body care and make-up accessories. The variation in the product range lets customers highlight their own personal style. No products are tested on animals, and as a minimum all the products meet the requirements in the laws and regulations of each sales market. The range also includes a Conscious line of products that are made using organic ingredients certified by Ecocert.

ACCESSORIES Bags, jewellery, scarves, hats and belts – in the finest leather and natural materials or in the season’s latest colours and designs.

SHOES A wide range covering everything from timeless designs and great everyday favourites to sporty trainers, high boots and open sandals.
H&M HOME is a modern, design-driven homeware concept. Collections include accessories for the living room, kitchen, bedroom, bathroom and children’s room. H&M Home always strives to offer contemporary and personal collections in different styles – from a rustic natural feel to simple modern design or a soft, nostalgic look. Through design and quality at the best price, H&M Home wants to make it easy and enjoyable for customers to give their homes a new look. H&M Home is sold online and in selected H&M stores.
& OTHER STORIES offers a wide range of shoes, bags, jewellery, beauty products, stationery and ready-to-wear, providing all the makings of a great look. The range extends from masculine tailoring to feminine chic and offers endless styling choices. Ateliers in Paris, Stockholm and Los Angeles create fashion, beauty and stationery collections with great attention to detail and quality, and always at a good price.

Successfully launched in 2013, & Other Stories has a multitude of stores across Europe and the US along with an online store at stories.com, and during spring 2017 the brand is launching in Asia and the Middle East.
CHEAP MONDAY is a Swedish jeanswear brand founded in Stockholm in 2004 and has been part of the H&M group since 2008. The brand creates bold and modern collections for men and women at a great price and mixes influences from street fashion and youth subcultures. Cheap Monday is primarily sold via selected retailers around the world, through its website cheapmonday.com and its iconic store located at 39 Carnaby Street, London.
COS is a fashion brand offering reinvented classics and wardrobe essentials for women, men and children. Made to be worn beyond the season, COS collections merge lasting quality with timeless design; clean silhouettes, innovative techniques and functional details.

Based in London, COS opened its first store on Regent Street in 2007. The brand is now available in select locations across Europe, Asia, North America, the Middle East and Australia.

Committed to supporting the world of art and design through collaboration, COS partners with established and emerging artists, studios and galleries all over the world, creating unique brand projects alongside the seasonal fashion collections. In 2016, COS collaborated with the Solomon R. Guggenheim Museum in New York to support the new Agnes Martin retrospective, and also created a limited-edition capsule collection for women and men, inspired by the artist’s work.
MONKI is a storytelling brand that offers great fashion at competitive prices. The brand wants to empower young women through an engaging and inclusive brand experience. Monki takes inspiration from their community and turns it into an inspiring fashion mix rooted in denim, Scandi-cool and Asian street style. Monki opens the door to its own imaginative world online and on the high street throughout Europe and Asia.

In September 2016, Monki celebrated their 10-year anniversary by presenting “Monkifesto”, a campaign consisting of 10 moves to empower young women.
WEEKDAY is a modern and mindful fashion and denim brand offering international current fashion, influenced by Scandinavian style, for women and men always at great prices. Weekday has a clear and strong sense of its own style and identity that balances between femininity and masculinity. Weekday is a brand, full of contrasts, for conscious and style-aware young adults.

Independently founded in Stockholm, Sweden in 2002, Weekday has been part of the H&M group since 2008. Today there are 28 Weekday stores throughout Europe as well as an online store, weekday.com.
Fashion as a force for change

The H&M group wants to use its size and position to create long-term, positive change for people and the environment throughout the value chain. The vision is to lead the change towards a circular, fair and equal fashion industry.
The world is growing, and the planet, with its finite resources, must provide for an ever larger population. The UN estimates that by 2050 there will be 9.7 billion people in the world, and also predicts a rapidly growing middle class. Satisfying the needs of current and future generations in a sustainable way demands new ways of making and consuming products. A shift is needed to a circular approach in which discarded products are no longer seen as waste but instead are recycled as valuable assets, and where growth is decoupled from the use of natural resources.

The H&M group wants to make it affordable for as many people as possible to express their own style through clothes that they like and that are also sustainable. To achieve this also in the long term, a new sustainability strategy has been drawn up with the vision of leading the change towards a sustainable fashion industry based on a fully circular approach and using only renewable energy. The vision also includes working to achieve a fair, equal workplace both within the H&M group and among suppliers, and contributing to good communities based on diversity and inclusion. The new strategy builds on the group’s sustainability work over many years – already a strong programme – and has been developed with help from external experts, innovators and other stakeholders. Setting a good example, paving the way for new solutions, stimulating innovation and having a positive impact on people’s lives are all important parts of the new sustainability strategy. Thanks to its size, the H&M group has a unique reach and opportunity to drive structural changes towards increased sustainability across the entire fashion industry. Through the strategy the H&M group will set long-term goals in line with scientific methods, in close cooperation with stakeholders within various areas.

THE UN’S SUSTAINABLE DEVELOPMENT GOALS
The reason that sustainability is so important to the H&M group is because of the company’s long-term focus and its values-driven way of working. Commercially, it is vital for the company’s future to have a sustainable supply of materials and stable sourcing markets where people work under good conditions. Showing the way on the basis of human rights, diversity and participation creates loyalty among both employees and customers, which in turn builds an even stronger company.

A starting point for the H&M group is that the business must contribute to the UN’s sustainable development goals. In 2015 the UN’s 193 member countries unanimously adopted 17 global sustainable development goals that are to be achieved by 2030. Ending poverty and hunger, creating decent work and economic growth, achieving equality and combating climate change are all goals that form part of Agenda 2030. All the goals are integrated with each other to achieve development that is socially, environmentally and economically sustainable.

TRADE FIGHTS POVERTY
Achieving these goals depends on sustainable growth. The UN estimates that 600 million more jobs will be needed in the world by 2030. As a buyer and seller in many markets, the H&M group helps provide employment which lifts people and nations out of poverty. The jobs are created largely in the textile industry in Asia, where much of the company’s sourcing takes place. Production is outsourced to independent suppliers and, with a strong local presence, the H&M group works for good and secure jobs to be created at these suppliers.

The majority of the suppliers’ employees are women. For many women this is their first job that provides an income, and so is a first step to more independence. In Cambodia, the World Bank says that the textile industry has helped bring about higher wages for women. The World Bank has also found that in Bangladesh, the export-led growth in the textile industry is the main contributory factor to poverty having been halved in the country since 1990. In a number of countries it can be seen that over time, jobs in the textile industry lead to further progress – resulting in increased productivity, a higher level of knowledge, greater specialisation and higher wages. The presence of long-term, responsible buyers – which are in turn driven by demand from increasingly aware consumers – is therefore vital to the future of these countries.

GOOD COLLABORATION BASED ON TRANSPARENCY
Progress has been made in the textile industry on a number of social and environmental issues, but as in other industries many challenges remain. To tackle complex sustainability issues systematically, more organisations need to work together. Only through collaboration can long-term changes be achieved, such as fair living wages and the circular use of resources. The H&M group therefore collaborates with others including trade unions, academics and scientists, the ILO, Sida, WWF and the Ellen MacArthur Foundation, as well as with other companies in the industry and with the H&M Foundation.

Another important focus area is openness and transparency. Increased traceability is important in enabling customers to make sustainable choices. In 2013 the H&M group was one of the first fashion companies in the world to publish its supplier list, on hm.com. The company is also a member of the Sustainable Apparel Coalition – an organisation that, among other things, is developing the Higg Index, an assessment tool that measures both social and environmental sustainability. The goal is to make the Higg Index an industry standard and to use it for labelling clothing and footwear.

SYSTEMATIC AND TARGETED WORK
Sustainability is an integral part of the H&M group’s business, and to be able to drive long-term change throughout the value chain it is important that all the company’s functions are pulling in the same direction. Each function and sales country sets its own measurable sustainability goals and activities, based on the strategic direction set by the company’s global sustainability department. In addition to supporting the other functions, the sustainability department has 25 experts who establish strategies, targets, key indicators, policies and follow-up procedures to ensure that the sustainability work is carried out systematically and leads forward. In the sales markets and in other functions around 50 employees focus primarily on sustainability. In the sourcing markets there are 145 employees whose job it is to ensure that suppliers live up to the company’s requirements of good social and environmental conditions, and to support the suppliers through various programmes and projects as they develop towards improved sustainability.

SUSTAINABLE LEADERSHIP WITH LONG-TERM GOVERNANCE
The H&M group’s head of sustainability is a member of the executive management, reporting directly to the CEO. The company’s board of directors discusses and addresses sustainability matters actively and regularly as part of the long-term governance of the company.
Sustainable materials in a closed loop

The H&M group’s vision of a circular and renewable fashion industry is reflected in increased use of recycled and sustainably produced materials.

To decouple growth from resource use, textile recycling needs to take place on a large scale. The materials that go into the loop also have to be sustainably sourced and fully traceable.

The Textile Exchange Preferred Fiber Market Report states that the H&M group is one of the world’s largest users of organic cotton, recycled polyester and lyocell, and is the world’s largest user of responsibly produced down. Responsible use of energy, water and chemicals is another important element of sustainable textile production. The H&M group’s chemical restrictions are among the strictest in the industry. The goal for 2020 is that there will be no hazardous chemicals in the suppliers’ production processes.

COTTON FROM SUSTAINABLE SOURCES
Cotton is a popular material that many love to wear. The H&M group’s goal is for 100 percent of the cotton used by the company’s brands to come from sustainable sources by 2020. Sustainable cotton is defined as organic, recycled or certified by the Better Cotton Initiative (BCI). H&M was one of the founders of BCI, which works to improve conditions for the cotton growers from an environmental, social and economic perspective. In 2016 sustainable sources made up 43 percent of the H&M group’s total cotton use, which means use has doubled since 2014.

Garment collecting in stores is one example of the H&M group’s circular approach. Since 2013 customers have been able to bring in old clothing and home textiles – of any brand and in any condition – to H&M stores globally. Monki, & Other Stories and Weekday also have garment collecting in stores. In 2016 alone, 15,888 tonnes of textiles were collected. The goal is to collect at least 25,000 tonnes annually by 2020. The commitment of customers and employees means waste is avoided, and at the same time giving materials a new life reduces environmental impact and saves natural resources. In 2016 H&M designed its third denim collection made partly with textiles recycled from the garments collected. In addition, the product range regularly includes garments made of cotton recycled from collected textiles.

More research is needed if a greater proportion of recycled fibres is to be added to the garments without compromising quality, and also to be able to separate fibres contained in mixed materials. To take further steps towards closing the loop, the H&M group collaborates with various experts and innovators – such as the innovation company Worn Again and the Ellen MacArthur Foundation. Another example is recycling company Sellpy, which makes it easier for consumers to sell things they no longer need and which the H&M group supports.

In parallel with the company’s work, the H&M Foundation also drives initiatives for a circular fashion industry from an industry perspective, with the aim of protecting the planet and people’s living conditions. In 2016 the H&M Foundation began collaborating with the Hong Kong Research Institute of Textiles and Apparel to develop new techniques within four years for recycling clothing made of mixed fibres.

AWARDS AND INDEXES
H&M’s sustainability work has been noticed by those outside the company. In 2016 RobecoSAM named H&M as the “Industry Mover” in global retail for the third year in a row, and for the sixth year in a row H&M was named as one of the world’s most ethical companies by the Ethisphere Institute. Recognition received during the year included the CSR Award from fashion industry journal Drapers, while the Fashion Transparency Index ranked H&M in the top three companies for production transparency out of the world’s 40 largest fashion corporations. Greenpeace named H&M as a Detox Leader, defined as companies “leading the industry towards a toxic-free future with credible timelines, concrete actions and on-the-ground implementation”. H&M is included in the Dow Jones Sustainability World Index, DJS Europe Index and FTSE4Good, among others, and is also listed among the Global 100 Most Sustainable Corporations in the World by analysis company Corporate Knights.

“To decouple growth from resource use, textile recycling needs to take place on a large scale.”
H&M Foundation

Textiles from citrus juice by-products, a polyester digester and an online marketplace for textile leftovers were three of the five innovations that won the Global Change Award 2015.

The annual competition started by the H&M Foundation is one of the world’s biggest competitions for early innovation. The competition aims to protect the planet and our living conditions by acting as a catalyst for innovations that can accelerate the shift to a circular fashion industry. The two other winning ideas in the 2015 competition were a process for making fabric out of algae and a method of converting waste cotton into new textile. On 10 February 2016 the grand award ceremony was held in Stockholm. The winners shared EUR 1 million, along with access to an innovation accelerator run by the H&M Foundation, Accenture and KTH Royal Institute of Technology in Stockholm.

The Global Change Award has attracted a great deal of interest and for the 2016 competition the H&M Foundation has received 2,885 applications from 130 countries. The winners will be presented in spring 2017.

The H&M Foundation is a non-profit global foundation that works to bring about long-lasting positive change for people and communities and to promote innovative ideas. The foundation is funded by the Stefan Persson family. Through partnerships with prominent organisations around the globe, the foundation drives change within four areas: Education, Water, Equality and Planet. The H&M Foundation can also provide emergency relief. Since 2013, the Stefan Persson family has donated SEK 1.1 billion to the foundation.

“Orange peel can be turned into clothes and algae into fabric.”

Switching to 100% renewable electricity

Climate change affects everyone and measures to slow down global warming are urgently needed, which is why the H&M group is switching to renewable electricity and constantly seeks to improve energy efficiency. In 2017 a new ambitious climate goal will also be launched.

A circular fashion industry needs to run on renewable energy. The H&M group is working towards 100 percent renewable electricity in its own operations, including all the company’s stores, offices, warehouses and data centres. In 2016, 96 percent of the company’s global electricity use came from renewable sources – up from 78 percent in 2015 and 27 percent in 2014. This has contributed to a 76 percent reduction in greenhouse gas emissions since 2014.

Energy savings within IT, such as for cash register systems, server centres and PCs, are an example of how growth can be decoupled from resource use. In the past five years annual IT-related energy use has fallen by more than a third, despite the H&M group’s substantial expansion.

In 2017 work for more efficient energy use will be enhanced, with a focus on new building and alterations to stores – including investments in new lighting, heating, ventilation and cooling technology. Work towards the goal of 100 percent renewable electricity continues, with an emphasis on solar and wind power. By creating large-scale demand for renewable electricity the H&M group can also drive the development of sustainable energy solutions in more and more countries.

The greatest climate impact from a garment’s life cycle is outside the company’s own operations, so the H&M group tries to help customers and suppliers act more sustainably – including through workshops with suppliers and government representatives in Bangladesh and India, to drive the use of renewable energy. To encourage customers to make more sustainable choices, all H&M group brands put climate-smart care labels in the garments.

ZERO TOLERANCE OF CORRUPTION

The H&M group has zero tolerance of all forms of corruption – a principle that is strongly linked to the company’s values and its commitment to human rights and sustainable development.

All affected employees and business partners have to sign the H&M group’s Code of Ethics, which clearly regulates areas such as the ban on the taking or giving of bribes and facilitation payments.
Collaboration for good working conditions

The H&M group’s business impacts many people and communities around the world. For sustainable development it is positive that much-needed jobs are created, and equally important that everyone who works for the company’s suppliers does so under good and secure conditions. The requirements that the company makes of its partners are based on internationally adopted standards such as the UN’s Universal Declaration of Human Rights, the ILO conventions and legislation in the individual countries. All the H&M group’s suppliers commit to fulfilling the social and environmental requirements that are regulated in the company’s strict code of conduct, known as the Sustainability Commitment.

The H&M group has production offices mainly in Asia and Europe that handle everything from order processing through quality and chemicals checks to making visits to suppliers – both announced and unannounced – to monitor compliance with the company’s sustainability requirements. Good, long-term business relationships are of great importance for bringing about lasting improvements. The H&M group therefore supports the suppliers in their own development towards improved sustainability.

Well-functioning dialogue between the parties in the labour market is an important precondition for achieving long-lasting improvements in working conditions, including fair living wages. Achieving structural changes in countries that do not have a history of good labour market dialogue is a major challenge for the industry, and an issue that the H&M group is driving as a priority. The company is dependent on access to stable sourcing markets in countries that are able to develop their industries in a sustainable way.

FAIR LIVING WAGES

Various partnerships conduct wide-ranging, active work to promote a textile industry in which all workers are able to organise and have their voices heard, where wages are revised regularly, where there are good relations between trade unions and employers, and where collective bargaining takes place. H&M’s global framework agreement with the trade unions IndustriALL and IF Metall is one example of this. The framework agreement has proved to be successful and has helped resolve various conflicts in factories, such as in Myanmar. It was therefore made permanent in 2016.

At factory level, the H&M group works for fair living wages through what is known as the Fair Wage method and through training in social dialogue. Good progress has been made, and to date 140 factories are included in the Fair Wage method and 290 factories in social dialogue training, in a total of eight countries including China and Bangladesh. Equally important is genuine commitment by governments, not least because it is the governments that are ultimately responsible for setting the legal frameworks and ensuring that minimum wages are set and revised annually. Thanks to the H&M group’s size and active presence, CEO Karl-Johan Persson and the company’s local representatives have had opportunity to meet government officials to discuss these matters. This dialogue will continue.

“Fair living wages require well-functioning dialogue between the parties of the labour market.”
Goals and key indicators

The H&M group engages in systematic, targeted sustainability work throughout the value chain. The results are reported in detail in the company’s annual sustainability report. Below are seven selected key indicators showing developments in some important areas.

**MORE SUSTAINABLE COTTON**

**GOAL**
By 2020 all cotton in the product range is to come from sustainable sources – in other words organic cotton, recycled cotton or cotton grown under the Better Cotton Initiative.

**RESULT**
The H&M group has increased the share of cotton from sustainable sources from around 13 percent* in 2012 to 43 percent in 2016.

*Historical material data has been updated as a result of improved calculation methods.*

**A CLOSED LOOP FOR TEXTILE FIBRES**

**GOAL**
By 2020 the H&M group’s global garment collecting is to bring in at least 25,000 tonnes of textiles per year for reuse and recycling.

**RESULT**
In 2016 customers brought in 15,888 tonnes of textiles.

**REDUCE EMISSIONS OF GREENHOUSE GASES**

**GOAL**
Reduce total emissions of greenhouse gases from own operations in absolute terms, despite the H&M group’s continued expansion.

**RESULT**
In 2016 emissions fell by 47 percent to 80,541 tonnes, from 151,753 tonnes the previous year. Since 2014 greenhouse gas emissions have been cut by 76 percent, mainly thanks to the switch to renewable electricity.

**REDUCE ENERGY USE**

**GOAL**
Reduce energy consumption per square metre in the H&M group’s stores by a total of 20 percent by 2020, as compared with 2007. The goal will be revised and enhanced in 2017, when further emphasis will be placed on this area.

**RESULT**
Electricity consumption in the stores decreased by 8 percent between 2007 and 2016.

**RENEWABLE ELECTRICITY**

**GOAL**
100 percent of all electricity used in the group’s own operations is to come from renewable sources.

**RESULT**
96 percent of all electricity used in the group came from renewable sources in 2016.

**ANTI-CORRUPTION**

**GOAL**
To discover all violations of the Code of Ethics.

**RESULT**
In 2016 a total of 39 suspected violations of the Code of Ethics were investigated. These investigations led to action being taken in 26 cases. The action taken involved both employees and suppliers.

*The first six indicators on this page (page 41) have been generally reviewed by the company’s auditors. For the auditor review statement see the company’s sustainability report for 2016.*

**FAIR WORKING CONDITIONS**

**GOAL**
Long-lasting improvements in working conditions at the supplier stage, including fair living wages, require well-functioning dialogue between the parties of the labour market. With the aim of achieving long-term change, one of the ways that the H&M group works is at factory level – through training in social dialogue and implementation of the Fair Wage method.

**RESULT**
In 2016 a total of 290 factories were included in social dialogue training and 140 factories had implemented the Fair Wage method.
Diversity creates positive energy

Committed employees are key to the H&M group’s success. Shared values create an open and inclusive workplace where colleagues from all over the world can grow and develop together.
Several unique brands and global expansion mean that the H&M group can offer employees around the world many ways to develop and find their own career. An inclusive corporate culture and equal working conditions are among the reasons why employees choose to stay with the company for a long time. Some explore exciting new areas of responsibility, while others continue to develop in their existing roles. Regardless of chosen career path, every employee makes a difference and contributes to the H&M group’s success.

**OWN RESPONSIBILITY WITH MANY OPPORTUNITIES**
Continual expansion means reaching more and more customers globally, and a continual great need for recruitment. In 2016 alone the H&M group welcomed more than 13,000 new employees, and today more than 161,000 colleagues work within the group. By attracting people who are passionate about fashion and design, are business-driven and customer-focused and who share a values-driven way of working, the H&M group can continue to develop.

New employees are given great responsibility right from the start. In order for employees to develop further in their roles and grow within the company, it is important that they thrive, feel motivated and are confident enough to take on new challenges. Through individual support, encouragement and dialogue employees are given regular feedback on performance and results achieved, as well as on how they live the company’s shared values in their daily work with colleagues. Working actively with individual development plans and providing access to various kinds of training and programmes for further development supports the company’s future expansion.

Since the H&M group is in constant development and motion, it is important to always have the right employee in the right place. This is why the many career opportunities need to be made accessible in clear and transparent ways. Switching between different areas of responsibility, markets, functions and brands develops employees and is beneficial to their future careers within the H&M group. When employees are given opportunities to share their experience and test their skills in a new setting, they learn from each other and develop both professionally and on a personal level.

**DIFFERENCES ARE HIGHLY VALUED**
The H&M group aims for diversity in all its teams. Diversity creates positive energy, contributes to innovation and creativity and improves the ability to deal with change. Employees being their unique selves are highly valued. Because when a mix of people with different backgrounds, interests and experience come together and share their knowledge and ideas, the H&M group can inspire and attract customers all over the world.

“**When employees with different backgrounds come together the H&M group attracts customers the world over.”**

Our shared values

The H&M group’s shared values have existed ever since the very first store opened in 1947 and they are a large part of what the company is and stands for. The values bring employees together and guide them in their daily work. Together the H&M group’s shared values help create an open, dynamic and down-to-earth company culture where anything is possible.

We are one team
We believe in people
Entrepreneurial spirit
Constant improvement
Cost-consciousness
Straightforward and open-minded
Keep it simple

The values are the red thread tying together the employees of the H&M group.
Women in India get increased opportunities

Equality and diversity within the H&M group help create strong teams where everyone works together reaching shared goals.

The H&M group wants all employees to have the same opportunities to grow and develop. Among other things, this means offering equal working conditions. However, in certain countries where the company operates women do not have the same access to the labour market as men. In India retail has lower participation from women. H&M is therefore working actively to increase women’s opportunities to take part in working life and make a career.

The local legislation for general working hours for women in most Indian cities restricts women to work before a certain time in the morning or after a certain time in the evening, for example. By offering safe transport to and from work at these times and proactively working together with local legislative authorities, H&M has been granted exemptions from the rules.

“The benefits that H&M offers mean that we women can work freely and choose working hours without having to worry about being afraid,” says Niki Pandey, department manager at the H&M store in Connaught Place, New Delhi.

H&M also has an indirect influence on women’s career opportunities by enabling greater work-life balance and offering paid parental leave to new fathers in the initial period after a child is born in addition to statutory maternity leave, as well as sickness insurance in connection with pregnancy and childbirth. Already at the recruitment stage, targeted initiatives encourage as many women as possible to apply.

“We have the same rights to grow within the company, there are no hierarchical or gender barriers,” says Niki.

The initiative in India is an example of how the H&M group’s social policies are put into practice. These include the “Global Policy on Diversity, Inclusion and Equality” and the “Global Non-Discrimination and Non-Harassment Policy”. They encompass all the group’s employees and aim to ensure a workplace where respect for human rights has the highest priority and there is zero tolerance of any kind of discrimination. The H&M group’s social policies are based on the UN and ILO conventions, among other things, and have their origins in the H&M group’s shared values.

“For me, fashion is something very personal. H&M stands for individualism, and I love the fact that everyone who works here is valued for their own unique perspective and set of skills,” says Mino. As store manager, Mino is involved in leading a large team of committed colleagues at H&M’s first store in New Zealand, located in the Sylvia Park shopping centre in Auckland. “Getting to develop your team, and see how colleagues even surpass their own expectations and perceived capabilities – that’s an amazing feeling. I truly believe that H&M is a workplace with endless opportunities, and that’s what makes the job so exciting.”

Always passionate about fashion and design, Mino was born and brought up in South Korea before moving to Auckland from Seoul ten years ago. In New Zealand’s largest city he has worked in retail for many years and he also runs his own popular style blog together with three design-conscious friends. Applying to H&M was an easy decision. “H&M is a global brand that has been making its mark in fashion for many years. It is also an innovative, fast-moving company that values diversity, and that is really important to me,” says Mino.

The store in Sylvia Park opened on 1 October 2016. “There were lots of us working intensively in the lead-up to that day. Colleagues from all over the world came here to help out. Getting to work with people from completely different backgrounds with different experiences and durations with the company was such a unique experience. I will never forget that feeling of teamwork.”

Passion for fashion and design in New Zealand

Exciting development opportunities and a global fashion brand that values the individual, Mino Kim, store manager in Auckland, explains what is so attractive about H&M.

“We have the same rights to grow within the company, there are no hierarchical or gender barriers.”

Niki Pandey, far right, together with the team.
Thirty years of fashion & Other Stories

Join Kicki Algotsson, store manager at & Other Stories, on her career journey through the years of fashion.

Kicki Algotsson’s story within the H&M group begins in the early 1980s. Style icons such as Madonna, Brooke Shields and Cindy Crawford inspired the teenager from the northern Swedish town of Skellefteå. “I was fashion-conscious even back then, flicking through fashion magazines and dreaming about all the gorgeous clothes.”

Today, Kicki has a well-filled fashion wardrobe. “I have lots of great pieces, but I wear them to work all the time. So when I'm going to a party, I don’t have anything to wear and I have to buy something new!” As a new store manager at & Other Stories she has every opportunity. “I really like the concept of & Other Stories where every woman can create her own style, her own story.”

Since autumn 2016 she has been responsible for the & Other Stories store in the Mall of Scandinavia outside Stockholm. For the whole of her career Kicki has worked in the H&M group. Her very first day at what is today a global fashion company was in 1984. It was the pre-Christmas rush and the place was the H&M store in Skellefteå. “My friend’s mum worked at H&M and I got to help out as a trainee, packing garments. That was how it all started.”

As time went on Kicki was offered a permanent position. “I was a sales advisor and clearly the youngest. The ‘older ladies’ in the shop showed me how to do the job. They knew how to provide great service and taught me everything from pinning up trousers in the fitting rooms to making the store look neat and tidy.” The year was 1987, the ‘older ladies’ were younger than Kicki is today, and H&M had celebrated its 40th birthday and was in six countries with a total of 188 stores. When the global expansion picked up real speed in the following years, Kicki longed for new challenges. She had already gained experience of different roles in the store, and had been involved in training and recruiting employees around Sweden. Now the world was waiting. Philadelphia, Washington, Athens and Istanbul are just some of the places where Kicki went to support new store openings.

In 2011 it was time for the next step. “I got the chance to become a store manager for the first time, and took it.” The new role meant moving to Sundsvall and the H&M store at the Birsta City mall. “I’m no economist and I haven’t been to university, but I’ve always been interested in sales. And as a leader you are never alone. It’s always together with the others in the team that you reach success.”

During her career Kicki has grown together with the H&M group, which today has over 4,300 stores in 64 markets. The company has several unique, independent fashion brands, and & Other Stories is the newest. “When the role of managing the store in Mall of Scandinavia came up, I was immediately interested. With & Other Stories it feels like being part of something brand new again – we’re in a development phase and buzzing with creativity. At our studio in Kungsholmen in Stockholm, I was struck by how much innovation and creative thought there can be in one place.”

What Kicki finds most rewarding in her role is creating an inspiring environment for the customers. “It’s about always seeing the little things, having an eye for detail. Like when we have presented a story in a nice new way, and we see the garments lift from the shelves. I love that feeling.”

“It’s always together with your colleagues in the team that you reach success.”

Visit about.hm.com to read more about what it is like to work and make a career within the H&M group and about the benefits offered. One example is the H&M Incentive Program for all employees within the H&M group which rewards and encourages long-term commitment to the company. Information can be found at career.hm.com about different professional roles and career opportunities at H&M. More about working at COS, & Other Stories, Weekday, Monki and Cheap Monday can be found on each brand’s website.
Inspiring shopping in stores and online

The H&M group is reaching increasingly more customers in both new and existing markets. The expansion encompasses all our fashion brands and is taking place through new stores as well as online.
The H&M group continues to expand at a fast pace and is currently present in 64 markets around the world. With more than 4,300 stores and brands H&M, COS, & Other Stories, Monki, Weekday and Cheap Monday as well as H&M Home, the H&M group is one of the world’s leading fashion companies.

In the 2016 financial year three new, exciting H&M markets were added: Puerto Rico, Cyprus and New Zealand. At the same time, rollout of e-commerce continued, with H&M’s online store now being available in 35 markets in Europe, North America and Asia. Including all company brands the H&M group opened more than one store a day – adding 427 new stores net during the year.

Together the stores and e-commerce create a strong global presence. The brands of the H&M group are for everyone who likes fashion, and diversity among the group’s customers is great. A broad and varied fashion range enables new stores to be established just as successfully in the world’s biggest fashion metropolises as in small and mid-sized cities. The majority of the expansion is taking place in existing markets. During the year, the H&M group opened its 4,000th store in the world – in the Indian city of Noida. This means the number of stores has doubled in just six years, as store number 2,000 opened in Japan in 2010. In 2016 Asia’s biggest H&M store to date opened in Taipei in Taiwan, where it was very well received by customers.

THREE NEW H&M MARKETS

The year’s new markets also enjoyed a very good reception. In October H&M’s first store in New Zealand opened at the Sylvia Park Shopping Centre in Auckland. The store was much awaited, with more than 1,000 customers lining up for the store to open. The two other new H&M markets, Puerto Rico and Cyprus, also attracted great interest, with crowds gathering ahead of openings both in The Mall of San Juan and on Ledra Street in Nicosia.

“"In 2016 we opened 427 new stores net and rolled out H&M’s online store to 11 new markets.”"

GROWING WITH SEVERAL FASHION BRANDS

The H&M group started in 1947 with a single ladieswear shop, Hennes, in the Swedish city of Västerås and has since grown to become a global fashion company, today encompassing several brands, each with its own unique identity. COS was launched in 2007, while Monki, Weekday and Cheap Monday were acquired in 2008 and & Other Stories opened its first stores in 2013.

In 2016 COS opened 41 new stores and expanded into the Czech Republic, Romania and Latvia. COS is a globally established fashion brand that now has 194 stores in 33 markets. For & Other Stories expansion was rapid, too. With the opening of 15 new stores and Poland as a new store market, at the end of the year & Other Stories had 45 stores in 11 markets. Monki opened 12 stores net, one of which opened on Mariahilfer Strasse 52 in Vienna, making it the first Monki store in Austria. Weekday also opened its first store in Austria during 2016, as well as its first store in Belgium. Weekday increased its number of stores from 20 to 28 during the year.

H&M Home is also continuing to expand, and during the year many new H&M Home departments were opened selling inspiring and modern homeware. At the end of the year, H&M Home could be found in a total of 269 H&M stores in more than 40 markets.
INSPIRING IN THE BEST LOCATIONS
Each brand’s identity is reflected in the stores, providing opportunity to use premises of various sizes, designs and characters. Store premises are leased rather than being owned, so as to ensure flexibility and enabling the H&M group to offer customers inspiring stores in the very best shopping locations.

Sustainability is an integral part of the business, and the group works actively to make both existing and new stores more sustainable in the long term. Examples include choosing renewable electricity and choices of interior design materials.

H&M’s ONLINE STORE AVAILABLE IN MORE AND MORE MARKETS
H&M is also expanding fast online and hm.com is one of the most visited fashion sites in the world. Rollout of H&M’s online store continued during the year, adding a further 11 markets: Slovenia, Croatia, Estonia, Latvia, Lithuania, Luxembourg, Ireland, Japan, Greece, Canada and South Korea. This means that customers in 35 markets can now shop online at H&M. COS and Monki currently offer e-commerce in 19 markets, while customers in 18 markets can shop online at Weekday and Cheap Monday. & Other Stories is available online in 14 markets.

A CLEAR OMNI-CHANNEL STRATEGY
The H&M group has a clear omni-channel strategy in which the digital and physical worlds are being integrated in order to offer customers a more seamless shopping experience. This includes among other things online purchases and returns in stores, click & collect, mobile payments, further development of the customer club and use of the mobile in stores for increased service.
“Each fashion brand of the group has its own unique identity, which is reflected in the stores.”
The digital and physical shopping experiences become increasingly integrated.

CONTINUED STRONG EXPANSION – REPHRASED GROWTH TARGET
In the light of the development phase that the industry and the H&M group are going through with an ever growing online market and digitalisation, it is natural to rephrase the company’s previous growth target. This means that the previous target of increasing the number of stores by 10–15 percent per year will instead become a sales target that includes both stores and online sales. The new growth target which applies for 2017 and going forward is that the H&M group’s sales shall increase by 10–15 percent in local currencies per year with continued high profitability.

NEW STORES AND MARKETS FOR 2017
A strong store portfolio gives the H&M group a unique proximity to its customers. Being close to the customers is becoming even more important as the physical and the digital shopping experiences become increasingly integrated.

In each market there should be an optimal mix of brands, space and number of stores. In 2017 the H&M group plans to open approximately 430 new stores net and enter five new markets – Kazakhstan, Colombia, Iceland, Vietnam and Georgia. Six new online markets are planned: Turkey, Taiwan, Hong Kong, Macau, Singapore and Malaysia.

Most of the new stores in 2017 will be H&M stores and approximately 70 to 80 stores will consist of the other brands in the group. H&M Home will also continue its rapid expansion, with approximately 50 new H&M Home departments planned for 2017.
COS, Miami.
Market overview

With several fashion brands, a total of 4,351 stores in 64 markets and e-commerce in a large number of countries the H&M group has a strong global position. In 2016 sales including VAT totalled SEK 223 billion.

Corporate governance report 2016
H & M Hennes & Mauritz AB

Good and sound corporate governance ensures that companies are managed as sustainably, responsibly and efficiently as possible in the interests of the shareholders. It is a matter of complying with external regulations and doing the right thing. In the H&M group, our values and global policies and guidelines are important tools in our approach to the world around us. Our Code of Ethics, which is signed by all our employees who have business relationships and by all business partners, clearly states our approach to doing business. Acting consistently and with a strong ethical compass is of great importance, because we operate in many different markets that have different challenges and where the laws, environmental requirements and social conditions may differ.

H & M Hennes & Mauritz AB is a Swedish public limited company. H&M’s class B share is listed on Nasdaq Stockholm. H&M applies the Swedish Corporate Governance Code (the Code) and has therefore prepared this corporate governance report in accordance with the Annual Accounts Act and the Code. H&M has applied the Code since 2005. The report was prepared by the company’s board of directors and has been reviewed by the company’s auditors.

The H&M group is governed by both external regulations and internal control documents.

Examples of external regulations that affect H&M:
- Swedish Companies Act
- Accounting legislation including the Swedish Bookkeeping Act and Annual Accounts Act
- EU Market Abuse Regulation (596/2014 / EU)
- Nasdaq Stockholm Rules for Issuers
- Swedish Corporate Governance Code (the Code), which is available at corporategovernanceboard.se. The Code is based on the principle of “comply or explain”, which means that companies applying the Code may deviate from individual rules provided they give an explanation of the deviation, describe the chosen alternative and provide the reasons for the deviation.

Examples of internal control documents:
- Articles of association
- The board’s work plan including instructions for the CEO and auditing committee
- The H&M Way
- Code of Ethics
- Code of Conduct: Sustainability Commitment (formerly Code of Conduct)
- Insider Policy
- Financial Policy
- Communications Policy
- Human Rights Policy
- Tax Policy
- Whistleblowing Policy
- Other policies, guidelines and manuals

H&M’s corporate governance is governed by values, since it is based both on external regulations and on our values – which, in brief, can be described as a sound, simple, straightforward, cost-conscious, entrepreneurial corporate culture that focuses on teamwork, our belief in people and constant improvement. Sustainability work is well integrated into every part of the business and forms a natural part of our employees’ everyday life.

Today, H&M is present in more than 60 retail markets and around 20 production countries. As a global company, it is of the utmost importance that we always act ethically, transparently and responsibly at every stage – from doing business with our suppliers to meeting with customers. Through good purchasing routines and close cooperation with our suppliers, our products should always be produced with the greatest possible consideration for people and the environment. Our risk management and internal control work ensure that we work purposefully in every part of the organisation, and the board of directors and auditing committee receive regular feedback from the organisation concerning how the internal control work is being conducted.

Every year a thorough review is carried out of the company’s risks, both operational and financial, with well-defined action plans to minimise risk. A long-term risk analysis is also performed, to provide supporting documentation for long-term commercial decisions.

Responsibility for management and control is shared between the shareholders, board, auditing committee and CEO. The board’s work plan states how the work is to be distributed between the board, the auditing committee and the CEO, with the board having the ultimate responsibility for the company’s organisation and administration and the CEO taking care of the ongoing management of the business, with regular feedback to the board.

The board of directors has eight members elected by the AGM, two employee representatives and two deputies for these. Overall, the board has 12 members – seven women and five men.

The composition of the board is characterised by breadth and diversity, and the various competencies of the board members complement each other well, providing experience within areas such as retailing, entrepreneurship, fashion, digitalisation, sustainability and communication which forms a good basis for valuable discussions with the CEO and management.

During the year the board held seven board meetings, including a statutory meeting in conjunction with the AGM. As in previous years, there was a very high level of attendance by board members. The CEO, CFO and chief accountant also attend all the meetings. Generally, one or two functions/departments are invited to each meeting to give a status presentation concerning what their particular function is working on; for example, every six months the head of sustainability provides an update on the company’s sustainability work, making reference to key indicators and targets. These presentations act as a complement to the CEO’s status reports and provide opportunity for more in-depth discussions concerning specific areas of the operations. At each board meeting the chair of the auditing committee also gives an account of the matters addressed by the auditing committee at its most recent meeting within areas such as accounting, auditing, tax, internal control, risks, as well as various new regulations and legislation.
H&M has chosen to have the corporate governance report as a separate document to the annual report in accordance with chapter 6 § 8 of the Swedish Annual Accounts Act. The information that must be provided under chapter 6 § 6 items 3–6 of the Annual Accounts Act is included in the administration report on page 75 of H&M's annual report for 2016 and is therefore not included in this corporate governance report. In accordance with chapter 6 § 9 of the Annual Accounts Act, the company's auditors have issued a statement on the corporate governance report that can be found on page 70.

In 2016 H&M deviated from the Code on the following two points:

1.2 At H&M's extraordinary general meeting on 8 March 2016 the board members present did not constitute a quorum, which was due to business trips and other commitments. The only material matter dealt with at the meeting was a motion to supplement the articles of association so as to allow general meetings also to be held in Solna. The chairman of the board was present at the meeting and was able to answer questions. In view of the nature of the matter, there was no possible adjustment of the proposed resolution, and for this reason the board members present were not required to constitute a quorum.

2.4 The fact that Stefan Persson, the chairman of the board, also chairs the nomination committee. The nomination committee is unanimous that, as the chairman of the board and the largest shareholder in H&M, Stefan Persson is the natural choice to chair H&M's nomination committee.

Among other things, you will find here:
- Previous corporate governance reports
- Articles of association
- Information on the nomination committee, board of directors, CEO, auditors, auditing committee, guidelines and policies, etc.
- Information and material from previous AGMs
- Risks and uncertainties
1. SHAREHOLDERS AND ANNUAL GENERAL MEETING

It is H&M’s shareholders who have the final decision on the company’s governance by voting at the general meeting to adopt the articles of association, which decide what the business will focus on, and to appoint the board of directors and its chairman, whose task it is to administer H&M’s affairs on behalf of the shareholders. The shareholders at the general meeting also elect auditors, decide on the principles of the nomination committee and select the members of this committee.

The general meeting is thus the company’s highest decision-making body and is the forum in which shareholders exercise their right to decide on the company’s affairs. H&M’s ordinary general meeting (annual general meeting) is held once a year, in late April or early May.

The date and venue are announced in H&M’s nine-month report as well as on hm.com, and the notice of the meeting is published in full usually five weeks before the meeting in Post- och Inrikes Tidningar and on hm.com, with an advertisement placed in Dagens Nyheter and Svenska Dagbladet. Shareholders registered directly in the register of shareholders who have given notice of their attendance on time are entitled to participate in the meeting and vote for the total number of shares that they hold. Shareholders who cannot be present in person may be represented by proxy.

Shareholders wishing to have a particular matter considered by the meeting may submit a written request to the board at least seven weeks before the meeting. H&M’s email address is also given for those shareholders who wish to submit their questions to H&M in advance. All the material belonging to the meeting, including the minutes of the meeting, is available on the website in both Swedish and English.

Extraordinary general meetings can also be held where there is a particular need to do so. The last time this happened was on 8 March 2016, when a resolution was passed to amend the articles of association in order to allow the 2016 annual general meeting to be held in the Erling Persson Hall, Aula Medica, Karolinska Institutet in Solna. This extraordinary general meeting, which was held at H&M’s head office on Mäster Samsugatan in Stockholm, was represented by 1,070 shareholders (either in person or by proxy), in total representing 80.5 percent of the votes and 59.8 percent of the capital.

Shareholders’ decision-making powers

Among other things, the general meeting makes decisions concerning:

- The election of board members and the chairman of the board
- Board fees including the compensation paid to members for work on the auditing committee
- Discharge of the members of the board and the CEO from liability
- Amendments to the articles of association
- The election of the auditor
- The adoption of the income statement and balance sheet
- The distribution of the earnings for the past financial year
- The election of members of the nomination committee and establishment of principles for the nomination committee
- Guidelines for remuneration to senior executives

Annual general meeting 2016

H&M’s annual general meeting 2016 was held on 3 May in the Erling Persson Hall, Aula Medica, Karolinska Institutet in Solna. A total of 1,796 shareholders were represented at the meeting, representing 83.3 percent of the votes and 65.5 percent of the capital. H&M’s board of directors, executive management and nomination committee as well as the company’s auditors attended the meeting.

The main resolutions passed were the following:

- Balance sheets and income statements for the parent company and for the group were adopted.
- A dividend to shareholders of SEK 9.75 per share was approved.
- The board members and the CEO were discharged from liability for the 2014/2015 financial year.
- The number of board members elected by the meeting to serve until the next AGM was set at eight, with no deputies.
- The following ordinary board members were re-elected: Anders Dahlvig, Lena Patriksson Keller, Stefan Persson, Melker Schörling, Christian Sievert and Niklas Zennström. Stina Bergfors and Erica Wiking Hager were elected as new board members. Lottie Knutson and Susi Kvart did not stand for re-election. Stefan Persson was re-elected as chairman of the board.
- The AGM approved the proposal from the nomination committee that the board fees be increased by SEK 250,000 to a total of SEK 6,075,000. The board fees are to be distributed as follows: chairman of the board SEK 1,625,000; members elected by the AGM SEK 575,000; members of the auditing committee an extra SEK 125,000; and the chairman of the auditing committee an extra SEK 175,000.
- The proposed principles for the nomination committee were approved and members of the nomination committee were elected.
- The proposed guidelines for remuneration to senior executives were approved.
- The proposed amendments to the articles of association were adopted.

Number of shareholders and ownership structure

At the end of the financial year H&M had 268,290 shareholders. The total number of shares in H&M is 1,655,072,000, of which 194,400,000 are class A shares (ten votes per share) and 1,460,672,000 are class B shares (one vote per share).

H&M’s largest shareholder is Stefan Persson and family, who via Ramsbury Invest AB hold all the class A shares, which represent 57.1 percent of the votes, as well as 406,049,043 class B shares, representing 41.9 percent of the votes. This means that as of 30 November 2016, Stefan Persson and family via Ramsbury Invest AB represent 69.0 percent of the votes and 36.3 percent of the total number of shares. Ramsbury Invest AB is thus the parent company of H & M Hennes & Mauritz AB.

Annual general meeting 2017

H&M’s annual general meeting 2017 will be held on Wednesday, 10 May 2017 in the Erling Persson Hall, Aula Medica, Karolinska Institutet in Solna.

To register to attend the 2017 AGM, see page 106 of H&M’s annual report for 2016 or visit hm.com/agm.

2. NOMINATION COMMITTEE

The nomination committee prepares information that will be used as a basis for decisions at the general meeting concerning election of the board of directors, the chairman of the board, the auditors and the chairman of the annual general meeting, fees to the board and auditors, as well as principles for the nomination committee. The nomination
committee’s proposal for the composition of the board is characterised by diversity and breadth as regards expertise, experience, background and gender balance. It also takes into consideration the H&M group’s stage of development and future focus.

Before each general meeting the nomination committee’s report is available to read as a separate document at about.hm.com/corporategovernance. The members of the nomination committee are elected by the AGM on the basis of principles for the nomination committee. Briefly, these state that the nomination committee is to be made up of the chairman of the board and four other members who are nominated by the four largest shareholders as of the last day of February that year, other than the shareholder that the chairman of the board represents.

Composition of the nomination committee following the 2016 AGM:
– Stefan Persson, chairman of the board
– Lottie Tham
– Liselott Ledin, Alecta
– Jan Andersson, Swedbank Robur Fonder
– Anders Oscarsson, AMF Pension

The nomination committee meets the requirements of the Code regarding the independence of members. Stefan Persson is the nomination committee’s chairman. This deviates from section 2.4 of the Swedish Corporate Governance Code. The 2016 AGM resolved that unless the members of the nomination committee agree otherwise, the chairman of the nomination committee shall be the member representing the largest shareholder. The nomination committee has found no reason to decide otherwise. The nomination committee was unanimous that in view of H&M’s ownership structure, Stefan Persson in his capacity as chairman of the board and principal shareholder is the natural choice to chair H&M’s nomination committee.

Work of the nomination committee in preparation for the 2016 AGM
The nomination committee elected at the 2015 AGM, which was the same as that elected at the 2016 AGM, presented its proposals for the 2016 AGM. The proposal for the composition of the board was to elect Stina Bergfors and Erica Wiking Häger as new members, and to re-elect Anders Dahlvig, Lena Patriksson Keller, Stefan Persson, Melker Schörling, Christian Sievert and Niklas Zennström. Lottie Knutson and Sussi Kvart did not stand for re-election. It was felt that the election of Stina Bergfors and Erica Wiking Häger would make a valuable contribution to the work of the board through their respective areas of expertise and experience in the following areas: media, digitalisation, entrepreneurship, commercial law, sustainability and risk management.

The nomination committee judged that the proposed composition of the board accorded well with section 4.1 of the Swedish Corporate Governance Code, i.e. that the proposed board was characterised by diversity and breadth of expertise, experience, background and gender balance. The nomination committee aims for gender balance and H&M’s board has had a good gender balance for many years. The proposed board members consisted of three women and five men (corresponding to 37.5 percent and 62.5 percent respectively, excluding employee representatives). The Swedish Corporate Governance Board wants owners to speed up developments towards achieving a share of around 40 percent for the less well represented gender overall on the boards of listed companies by 2020. Large companies should have achieved around 35 percent on average already in 2017. The board of H&M thus meets the Corporate Governance Board’s level of ambition for major companies for 2017. To achieve continued gender balance, H&M’s nomi- nation committee discusses this each year and accordingly identifies future board candidates with relevant backgrounds and experience on a continuous basis.

It was felt that the proposed composition of the board more than satisfies the requirements made of expertise and experience, taking into account the company’s operations and future development. The proposed composition was also considered to meet the applicable requirements well in respect of the independence of board members and their stock market experience.

Work of the nomination committee in preparation for the 2017 AGM
Since the 2016 AGM the nomination committee has held one meeting so far at which minutes were taken and has also been in contact at other times. The work of the board and its composition are assessed on an ongoing basis over the year.

Stefan Persson gave a verbal account of this at the nomination committee’s first meeting. The conclusion was that the board had worked effectively over the course of the year. The board’s work is presented so that the nomination committee can make the best possible assessment of the board’s collective competence and experience.

The nomination committee also discusses the size of the board, its composition, the election of a chairman for the AGM, fees for board members and, when appropriate, the election of auditors. No fees were paid to the nomination committee’s chairman or to any other member of the nomination committee. The nomination committee’s work in preparation for the next AGM is not yet complete and more information will be presented before and at the 2017 AGM.

3. AUDITORS
The auditors, who are independent and appointed by the shareholders at the annual general meeting (AGM), scrutinise H&M’s annual report, consolidated financial statements, accounts, sustainability report and corporate governance report, and examine whether these have been prepared in accordance with current laws and recommendations. The auditors also scrutinise the management of the H&M group by the board and CEO, and review compliance with the guidelines on remuneration to senior executives adopted by the AGM.

At the 2013 AGM the accounting firm Ernst & Young AB was elected as auditor of H&M for a four-year period, i.e. until the end of the 2017 AGM. Authorised public accountant Åsa Lundvall from Ernst & Young holds the main responsibility for the audit.

As previously, the 2016 AGM resolved that the auditors’ fees should be paid based on the invoices submitted. The fees invoiced by the auditors over the past two financial years are reported in note 9 of the annual report for 2016.

Ernst & Young AB (EY) is a member of a global network used for auditing assignments for most of the group’s companies and meets H&M’s requirements with respect to competence and geographical coverage. The auditors’ independent status is guaranteed partly by legislation and professional ethics rules, partly by the accounting firm’s internal guidelines and partly by the fact that non-auditing assignments must be approved in advance by the auditing committee. Åsa Lundvall is an authorised public accountant who conducts auditing assignments for companies such as Apotek Hjärtat, ATG, DGC One, Systemair and Systembolaget.

The auditors attend all meetings of the auditing committee, and as in previous years, the chief auditor Åsa Lundvall also took part in the board meeting held in January 2016 in order to notify the board of the scope, focus, significant considerations and conclusions of the audit of the 2015 financial year. In addition to this involvement, the auditor meets regularly with the chairman of the board, the chairman and
other members of the auditing committee, the executive management and other key individuals. The auditor also takes part in the AGM, reporting the conclusions drawn from the audit.

Alongside its mandate as elected auditor, EY has also carried out related tasks such as verification of the Sustainability Report. In addition, EY has assisted with other consulting services, primarily tax advice. EY has internal processes to ensure its independence before these tasks are begun. The auditing committee also has a process for approving non-auditing services in advance, before such assignments are begun. The auditing committee evaluates the auditor annually to gain assurance that the auditor's objectivity and independence cannot be questioned.

4. BOARD OF DIRECTORS
The task of the board of directors is to manage H&M’s affairs in the interests of the company and all its shareholders. This means that the board has the overall responsibility for H&M’s administration. This takes place in a long-term, sustainable way with a focus on the customer offering and growth.

In addition to laws and recommendations, H&M’s board work is regulated by the board’s work plan, which contains rules on the distribution of work between the board, its committees and the CEO and on financial reporting, investments and financing. The work plan, which also includes a work plan for the auditing committee, is updated when needed but is established at least once a year.

Composition of H&M’s board and independence of its members
The board members are elected by the shareholders at the annual general meeting for the period up until the next AGM. Since the 2016 AGM the board has consisted of eight ordinary members elected by the AGM and no deputies. There are also two employee representatives, with two deputies for these positions. The board is comprised of seven women and five men. Only the employee representatives are employed by the company. Since the 2016 AGM the board has comprised the following members elected by the meeting: Stefan Persson (chairman), Stina Bergfors, Anders Dahlvig, Lena Patriksson Keller, Melker Schörling, Christian Sievert, Erica Wiking Häger and Niklas Zennström. Ingrid Godin and Margareta Welinder are the regular employee representatives, with Rita Hansson and Alexandra Rosenvist as their deputies. For more facts about H&M’s board members, see pages 66–69.

The board members are to devote the time and attention that their assignment for H&M requires. New board members receive introductory training which, among other things, includes meetings with the heads of various functions.

[^1]: Independent of the company and company management in accordance with the Swedish Corporate Governance Code.
[^2]: Independent of major shareholders in the company in accordance with the Swedish Corporate Governance Code.
[^3]: Fees as resolved at the 2015 annual general meeting. This means that the fees relate to the period until the next AGM, i.e. the period 29 April 2015 to 3 May 2016. The amounts were paid out after the 2016 AGM.
[^4]: Attendance via technology is equated with attendance in person.
[^5]: Class A shares owned through Ramsbury Invest AB.
[^6]: Class B shares owned through the company Erica Wiking Häger as of 30 January 2017.
[^7]: Lottie Knutson and Sussi Kvart stepped down from the board at the AGM on 3 May 2016, and consequently their shareholdings are stated as of that date. Stina Bergfors and Erica Wiking Häger were first elected to the board at the AGM.
[^8]: There are no outstanding share or share price related incentive programmes for the board of directors.
[^9]: 1,200 shares are owned through Lena Patriksson Keller’s private company Verdani Holding AB. 9,450 shares held by spouse.
[^10]: Shares owned through Melker Schörling AB.
[^11]: Christian Sievert is not considered independent of Ramsbury Invest AB since Ramsbury Invest AB is a major shareholder in a company of which Christian Sievert is CEO.
[^12]: Shares held by related parties: 19,000 shares held through Christian Sievert’s company Whitechrism Industri AB and 2,400 shares held by spouse and children. Additional information: In addition to Christian Sievert’s shareholding shown above, Christian Sievert holds 9,000 H&M shares via a pension plan.
[^13]: 750 shares are owned through Erica Wiking Häger’s company Erica Wiking Häger Advokatförlagbolag, and 85 shares are held by her spouse.
[^14]: 9,450 shares held by spouse.
The composition of H&M’s board during the year met the independence requirements set out in sections 4.4 and 4.5 of the Code. This means that the majority of the board members elected by the general meeting are independent of the company and company management. The majority of the board members are also independent of the company’s major shareholders.

**Number of board meetings**

During the financial year H&M normally holds six regular board meetings, one of which is the statutory board meeting. Extraordinary board meetings are held when the need arises. The CEO attends all board meetings, except when the CEO’s terms of employment are being discussed. The CEO reports to the board on the operational work within the group and ensures that the board is given relevant and objective information on which to base its decisions.

The CFO and chief accountant also attend the board meetings in order to provide financial information. The board is assisted by a secretary who is not a member of the board.

During the 2016 financial year seven board meetings were held. The level of attendance at board meetings is high, with each member’s attendance shown in the table on page 60.

**Work of the board in 2016**

H&M’s board meetings are generally structured as follows, which is then supplemented by one or more business presentations, e.g. by heads of functions or country managers.

The following areas are usually reviewed at each board meeting:
- Minutes of the previous meeting
- CEO’s status report
- Report by CFO
- Strategic matters
- Feedback from latest auditing committee meeting
- Financial reporting, such as interim report, annual report
- Decisions on particular matters

During 2016 CEO Karl-Johan Persson provided information on the following, among other things: sales, costs, results, the customer offering for each brand and market performance, investments, store and online expansion, sustainability, external factors and development opportunities. The CEO also provided ongoing information on purchasing, production, the stock-in-trade, marketing and PR activities, organisational changes, the broadening of the product range, and new initiatives and the development of new brands. Decisions taken by the board during the year included the opening of around 425 new stores net, with Puerto Rico, Cyprus and New Zealand as new store markets for 2016, as well as rapid online expansion, with eleven new H&M online markets in 2016.

The sector is undergoing interesting structural changes and rapid shifts in technology – which creates great opportunities, but also puts demands on the organisation. The board therefore discusses the significance of the increased digitalisation and which investments need to be made in order to be able to offer customers a shopping experience that is as complete and seamless as possible. The board receives ongoing updates on these projects. These might concern development of the online offering in terms of faster delivery options, mobile payment solutions, handling of returns, changes of platforms and advanced data analytics, etc. The long-term investments being made aim to ensure the group’s future expansion and position.

The group’s integrated sustainability work is very important and is discussed regularly by the board. Every six months, the head of sustainability provides an update on the group’s sustainability work with reference to key indicators and targets, such as compliance with the Code of Conduct, sustainable material, climate impact, anti-corruption, etc.

At each board meeting the chairman of the auditing committee reports to the board on what the auditing committee discussed at its latest meeting. This primarily concerns areas such as accounting, auditing, tax, internal control, risk, various new regulations and new legislation, etc. The overall risk assessment, involving the very largest risks – in both the short and the long term – is then also discussed at subsequent board meetings. At four of the year’s meetings the board goes through quarterly reports before they are published and at the January meeting the board discusses the annual report, with the auditor also reporting on the year’s audit.

During the year the board takes a number of different decisions such as on the expansion and investment plan, the proposed dividend, which was SEK 9.75 per share for the 2015 financial year, as proposed to the 2016 AGM, guidelines for remuneration of senior executives, the financial reports, etc. In 2016 the board also took the decision to propose amendment of the articles of association. At a board meeting on 30 January 2017 the board decided to rephrase the earlier growth target.

Since H&M does not have a separate review function (internal audit) for work on internal control, but has instead established its own model for managing the company’s risk and internal control (see pages 63–65), once a year the board assesses the need for a separate internal audit function. This year the board again reached the conclusion that the present model for monitoring internal control is working in a satisfactory way.

Before the 2016 annual general meeting the board carried out an assessment of the application of the guidelines for remuneration to senior executives that were adopted by the 2015 AGM. The results of this assessment were published on the website in good time before the 2016 AGM.

H&M has no remuneration committee, since the board of directors deems it more appropriate for the entire board to carry out the tasks of a remuneration committee. It is the board that prepares the proposed guidelines for remuneration to senior executives that are presented at the AGMs, and it is the board that decides on the CEO’s salary in accordance with the guidelines adopted at the last AGM. The board continually assesses the CEO’s work and once a year discusses this matter separately in conjunction with the setting of the CEO’s remuneration for the coming year. No member of executive management is present when this is discussed.

**5. AUDITING COMMITTEE**

The auditing committee monitors the company’s financial reporting, which among other things involves monitoring the effectiveness of the company’s internal control and risk management. Its work includes handling auditing issues and financial reports published by the company. The auditors attend the meetings of the auditing committee to report on their scrutiny of the group’s annual report and financial statements, including the consolidated financial statements.

The auditing committee also reviews and monitors the impartiality and independence of the auditor, and regulates which assignments the accounting firm may conduct for H&M in addition to the audit. The auditing committee receives a written assurance of independence from the auditor stating which assignments the accounting firm has provided to H&M during the financial year in addition to the audit. The auditing committee also assists the nomination committee with any proposals to the AGM concerning the election of auditors. H&M’s auditing committee is made up of three board members, two of whom have expertise in accounting or auditing while the third
has expertise in commercial law. All the members are independent of the company and its management. The majority of the members are also independent of the company’s major shareholders. The auditing committee is appointed annually by the board of directors at the statutory board meeting held in conjunction with the AGM. Since the statutory meeting held in conjunction with the 2016 AGM, the auditing committee has consisted of chairman Christian Sievert and members Anders Dahlvig and Erica Wiking Häger. The committee held four meetings at which minutes were taken during the 2015/2016 financial year.

EY attended the auditing committee meetings and reported on the auditing assignments. The meetings were also attended by CFO Jyrki Tervonen and chief accountant Anders Jonasson, among others. The committee’s meetings are minuted and the minutes are then distributed to the board members.

During the year the auditing committee addressed the following matters, among others:
- The company’s financial reporting, including interim reports, the corporate governance report and annual report.
- Compliance with the group’s internal control and risk management processes and review of the overall risk analysis for the group – both financial risk and operational risk – with well-defined action plans to minimise risk. Among others, the following functions also gave presentations/provided information on their work: expansion/construction, security, accounting/tax and H&M’s buying department.
- The internal pricing model and tax matters. A status update regarding tax matters is given at each meeting, which is partly related to the OECD’s BEPS project that deals with, among other things, how and where profits in multinational companies are to be taxed.
- In addition, customs matters were discussed in view of the fact that this is becoming an increasingly pressing matter for multinationals due to increased protectionism in certain countries.
- EY informed the committee of the audit plan, the scope of the audit and the results of scrutiny carried out.
- Review of the auditors’ independence and impartiality. The auditing committee finds that it is clear which assignments EY takes on in addition to auditing and sees no reason to question the accounting firm’s impartiality. A process has been established for non-auditing services to be approved in advance. H&M also uses consulting services from other accounting firms and tax advisors.

6. EMPLOYEE ORGANISATIONS

Under Swedish law, the employees have the right to appoint employee representatives with deputies to the company’s board. These are appointed via employee organisations (trade unions). The trade unions appoint two board members and two deputies to the board of H&M.”

8. 9. ORGANISATION AND MANAGEMENT

The H&M group has a multi-brand matrix organisation with currently seven well-defined brands: H&M, COS, & Other Stories, Monki, Weekday, Cheap Monday and H&M Home. Each brand has its own organisation and managing director, and all the brands have their own local sales organisations. Centrally, there are also a number of group-wide functions that support each brand in order to capitalise on the benefits within these shared areas, so that each brand and country works purposefully according to central policies and guidelines. The CEO is responsible for day-to-day management of the H&M group and appoints the members of the executive management team, which is made up of the CEO plus 10 others – six of whom are women. The executive management team consists of the chief financial officer and the individuals responsible for the following group-wide functions: production, sustainability, expansion, communications, human resources, business development and logistics, as well as the person responsible for the H&M brand and the person responsible for new business (which includes the other brands such as COS, & Other Stories, Monki, Weekday, Cheap Monday and H&M Home). Those responsible for the other group-wide functions are appointed by the chief financial officer. The matrix organisation provides a good combination of central and local perspectives on leadership and entrepreneurship.

The local sales organisations are responsible for sales, profitability and daily operations in their country, giving them a collective responsibility for all the functions in their country.

Karl-Johan Persson, born in 1975, has been the chief executive officer of H & M Hennes & Mauritz AB since 1 July 2009.

Before taking over as CEO, Karl-Johan Persson held an operational role within H&M from 2005, including working as head of expansion, business development, brand and new business. Since 2000 Karl-Johan Persson has been a member of the boards of H&M’s subsidiaries in Denmark, Germany, the US and the UK. From 2006 until 2009 he was also a member of the board of H & M Hennes & Mauritz AB.

From 2001 until 2004 Karl-Johan Persson was CEO of European Network. Karl-Johan Persson holds a BA in business administration from the European Business School in London. Karl-Johan Persson currently has external board assignments for, among others, the Swedish Chamber of Commerce in the UK, Ramsbury Invest AB and the GoodCause Foundation. Since 2013 Karl-Johan Persson has also been a member of the board of the H&M Foundation. Karl-Johan Persson is a shareholder in Ramsbury Invest AB, and also personally holds 12,136,289 class B shares in H&M.

Internal control

The board of directors is responsible for the company’s internal control, the overall aim of which is to safeguard the company’s assets and thereby its shareholders’ investment. Internal control and risk management are part of the board’s and the management’s control and follow-up responsibilities, the purpose of which is to ensure that the business is managed in the most appropriate and effective manner possible, to ensure reliable financial reporting and to ensure compliance with applicable laws and regulations. This description of H&M’s internal control and risk management for financial reporting has been prepared in accordance with chapter 6 § 6 of the Swedish Annual Accounts Act and section 7.4 of the Swedish Corporate Governance Code.

H&M uses the COSO framework as a basis for internal control over financial reporting. The COSO framework, which is issued by the Committee of Sponsoring Organizations of the Treadway Commission, is made up of the following five components: control environment, risk assessment, control activities, information and communication as well as monitoring.

CONTROL ENVIRONMENT

The control environment forms the basis of internal control, because it includes the culture that the board and management communicate and by which they work. The control environment is made up primarily of ethical values and integrity, expertise, management philosophy, organisational structure, responsibility and authority, policies and guidelines, as well as routines.

Of particular importance is that management documents such as internal policies, guidelines and manuals exist in significant areas and that these provide the employees with solid guidance. Within H&M there exists above all the Code of Ethics; an ethical policy that permeates the entire company, since it describes the way in which the employees should act within the company and in business relations with suppliers. For a number of years the group has had a document called “The H&M Way”, which briefly describes and brings together what H&M stands for and provides a basis for how employees are to act in relation to each other and the outside world. It also refers to the group’s main policies.

H&M’s internal control structure is based on:

- The division of work between the board of directors, the auditing committee and the CEO, which is clearly described in the board’s formal work plan. The executive management team and the auditing committee report regularly to the board based on established routines.
- The company’s organisation and way of carrying on business, in which roles and the division of responsibility are clearly defined.
- Values and guidelines, as well as policies, routines and manuals; of these, the Code of Ethics, the financial policy, the insider policy, the communications policy and the store instructions are examples of important overall policies.
- Awareness among the employees of the importance of maintaining effective control over financial reporting.
- Control activities, checks and balances, analysis, reporting.

The H&M Group has a matrix organisation (see page 64), which means that those responsible for the group-wide functions are responsible for the efficiency of work within their function at each brand (the horizontal arrows). Each brand has its own organisation and managing director, and all the brands have their own local sales organisations.

Internal control is evaluated annually by the relevant group function, which checks that its function in each country is working accord-

H&M has a communications policy providing guidelines for communication with external parties. The purpose of the policy is to ensure that all information obligations are met and that the information provided is accurate and complete.

Financial communication is provided via:
- H&M’s annual report
- Interim reports, the full-year report and monthly sales reports
- Press releases on events and circumstances that may impact the share price
- H&M’s website hm.com

MONITORING
In 2016 the group functions/central departments assessed internal control within their respective functions in the sales countries based partly on general issues and partly on department-specific issues, using the COSO model.

The work resulted in a plan of action for each central department defining the areas that ought to be improved in order to further strengthen internal control, not only in respect of each country but also for the central function. The functions also followed up on the assessments made in the previous year. It is felt that the way in which H&M assesses internal control is firmly established within the organisation. It is an aid and an instrument that the central functions can use to ensure that their respective departments in the sales countries are working in a uniform and desirable way. The assessment of internal control also allows each sales country to provide valuable and constructive feedback to the central function regarding where there is room for improvement at central level. An important part of the internal control work is the feedback to the country management (country manager and country controller) which the central function provides based on the results of the evaluation in each country. This is done with a view to transparency and to ensuring that the countries adopt best practice.

Within the production organisation there is a firm and regular control and monitoring process for the internal routines that are brought together in the Routine Handbook for Production. These routines are about how H&M ensures that the company does business in an ethical and transparent way. Most of these routines are monitored on a monthly basis at regional level and every other month at global level.

Internal store auditors perform annual checks at the stores with the aim of determining the strengths and weaknesses of the stores and how any shortcomings can be corrected. Follow-up and feedback with respect to any non-compliances found during the assessment of internal control constitute a central part of internal control work.

The board of directors and the auditing committee continuously evaluate the information provided by the executive management team, including information on internal control. The auditing committee’s task of monitoring the efficiency of internal control by the management team is of particular interest to the board. This work includes checking that steps are taken with respect to any shortcomings detected and suggestions made during the assessment by the central departments and internal store auditors, as well as by external auditors. The work on internal control maintains awareness of the importance of effective internal control within the group and ensures that continuous improvements are made.

INTERNAL AUDIT
In accordance with section 7.4 of the Swedish Corporate Governance Code, during the year the board assessed the need for a specific internal audit department. The board concluded that H&M’s present model of monitoring internal control is the most appropriate for the company. In the board’s opinion, this model – which is applied by the central departments such as accounts, communications, security, logistics, production, etc. in the subsidiaries – and the work carried out by internal store auditors are well in line with the work performed in other companies by an internal audit department. It was therefore deemed that there was no need for an internal audit department.

The issue of a specific internal audit department will be reviewed again in 2017.

Stockholm, January 2017

The Board of Directors

More information on H&M’s corporate governance work can be found in the section on corporate governance at hm.com. The next four pages contain information about the board members.
CHRISTIAN SIEVERT  
Board member and chairman of the auditing committee

About the board members

STEFAN PERSSON
Chairman of the board. Born 1947.

Primary occupation
Chairman of the board of H&M.

Other significant board assignments
Member of the board of MSAB and board assignments in family-owned companies.

Education

Professional experience
1982–1998 CEO of H&M.
1998– Chairman of the board of H&M.

STINA BERGFORS

Primary occupation
Co-founder of digital media company United Screens, where Stina currently works on strategic matters and business development.

Other significant board assignments
Member of the board of INGKA Holding BV and of the Swedish Media Commission’s group of experts; also involved in the Prince Daniel Fellowship at the Royal Swedish Academy of Engineering Sciences (IVA).

Education
MSc in business administration, honorary doctorate from Luleå University of Technology.

Professional experience
2005–2008 CEO of Carat Sverige AB
2016– Strategy and business development at United Screens.

ANDERS DAHLVIG
Board member and member of the auditing committee. Born 1957.

Primary occupation
Board assignments.

Other significant board assignments
Chairman of Inter IKEA Holding BV and member of the boards of Kingfisher plc, Oriflame SA, Axel Johnson AB, Resurs Bank AB and Pret A Manger.

Education
MSc in business administration, Lund University, 1980 and MA from the University of California, Santa Barbara, 1982.

Professional experience
1983–1993 Various roles within IKEA in Sweden, Germany, Switzerland and Belgium.
1993–1997 Managing director of IKEA UK.
1999–2009 President and CEO of the IKEA Group.

LENA PATRIKSSON KELLER
Board member. Born 1969.

Primary occupation
Executive Chairman at branding and communications agency Patriksson Communication AB.

Other significant board assignments
Chairman of Inter IKEA Holding BV and member of the boards of Kingfisher plc, Oriflame SA, Axel Johnson AB, Resurs Bank AB and Pret A Manger.

Education
MSc in business administration, Lund University, 1980 and MA from the University of California, Santa Barbara, 1982.

Professional experience
1983–1993 Various roles within IKEA in Sweden, Germany, Switzerland and Belgium.
1993–1997 Managing director of IKEA UK.
1999–2009 President and CEO of the IKEA Group.
ERICA WIKING HÄGER
Board member and member of the auditing committee. Born 1970.

Primary occupation
Lawyer and partner at the law firm Mannheimer Swartling since 2009 and chair of Mannheimer Swartling’s Corporate Sustainability & Risk Management practice group.

Other significant board assignments
Member of the board of Stockholm Chamber of Commerce.

Education
Master of Laws from Uppsala University, LL.M. from Harvard Law School in the US and supplementary studies at the University of Oklahoma in the US and Ruprecht-Karls-Universität Heidelberg in Germany.

Professional experience
1995 – 1997 District court service, Sollentuna District Court.
1999 – 2000 Corporate counsel, Corechange Inc., Boston, USA.
2000 – 2008 Associate, Mannheimer Swartling.
2009 – Partner, Mannheimer Swartling.

CHRISTIAN SIEVERT
Board member and chairman of the auditing committee. Born 1969.

Primary occupation
CEO of investment company AB Max Sievert.

Other significant board assignments
Member of the boards of AB Max Sievert and AB Anders Löfberg.

Education
MSc in business administration from the School of Economics, Stockholm, 1994.

Professional experience
2014– CEO of investment company AB Max Sievert.

MELKER SCHÖRLING
Board member. Born 1947.

Primary occupation
Founder and owner of MSAB.

Other significant board assignments
Chairman of MSAB, AarhusKarlshamn AB, Hexagon AB and Hexpol AB.

Education
MSc in business administration from the School of Business, Economics and Law, Gothenburg University, 1970.

Professional experience

NIKLAS ZENNSTRÖM

Primary occupation
CEO of venture capital company Atomico, which focuses on fast-growing tech companies, and involved in Zennström Philanthropies, which supports organisations particularly associated with climate change, social entrepreneurship, the Baltic Sea environment and human rights.

Other significant board assignments
Member of the boards of Atomico, Zennström Philanthropies, Farmdrop Rovio, Lilium and Orbital Systems.

Education
Dual degrees in business administration and engineering physics from Uppsala University.

Professional experience
1997 – 2000 Director of internet services, Tele2 Europe ASA, Luxembourg/Amsterdam.

ALEXANDRA ROSENQVIST
AUDITOR’S STATEMENT ON THE CORPORATE GOVERNANCE REPORT
To the Annual General Meeting of H & M Hennes & Mauritz AB (publ),
corporate identity number 556042-7220

Assignment and division of responsibility
We have reviewed the corporate governance report for the financial year 1 December 2015 to 30 November 2016. The corporate governance report is the responsibility of the Board of Directors, which is responsible for the report being prepared in accordance with the Swedish Annual Accounts Act. Our responsibility is to express an opinion on the corporate governance report based on our review.

Orientation and scope of review
Our review was conducted in accordance with RevU 16, Auditor’s review of the corporate governance report. This means that we planned and performed the audit in order to obtain a reasonable degree of assurance that the corporate governance report is free from material misstatement. An audit includes examining, on a test basis, evidence supporting the information in the corporate governance report. We believe that our audit provides a reasonable basis for our opinion set out below.

Opinion
In our opinion, a corporate governance report has been prepared and its content is consistent with the annual accounts and the consolidated accounts.

Stockholm, 30 January 2017

Ernst & Young AB

Åsa Lundvall
Authorised Public Accountant
Administration report

The board of directors and the chief executive officer of H & M Hennes & Mauritiz AB (publ), 556042-7220, domiciled in Stockholm, Sweden, hereby submit their annual report and consolidated accounts for the financial year 1 December 2015 to 30 November 2016, hereinafter referred to as the 2016 financial year.

BUSINESS
The H&M group’s business consists mainly of sales of clothing, accessories, footwear, cosmetics and home textiles to consumers.

The H&M group’s brand portfolio includes clearly defined fashion brands – H&M and H&M Home, COS, & Other Stories, Monki, Weekday and Cheap Monday – each of which has its own unique profile and identity. The group’s brands complement each other well, and together they offer customers a wide variety of styles and trends at various price points. All the brands share the same passion for fashion, quality and best price and all aim to dress customers in a sustainable way.

The broad customer offering allows people around the world to dress in their own personal style.

H&M is a design-driven, creative and responsible fashion company guided by strong values based on a fundamental respect for the individual and a belief in people’s ability to use their initiative. With a focus on fashion and customers, and a shared aim among employees to always exceed customers’ expectations, H&M has developed since 1947 into one of the world’s leading fashion companies.

For each brand there is a design and buying function where designers, pattern makers and buyers work together to create an inspiring product range for their particular customer group. H&M’s design and buying function creates its collections centrally in Stockholm – while COS, for example, has its design and buying function in London.

Production
The group does not own any factories but instead has its products manufactured by around 790 independent suppliers through local production offices, mainly in Asia and Europe. For a few years now a small part of production has also taken place in Africa. To ensure future expansion, production capacity and geographical location are continually reviewed. H&M is a responsible company and considers it of the utmost importance to ensure that the products are of good quality and have been produced under good working conditions with the greatest possible consideration for people and the environment. Each supplier therefore undergoes a careful process based on the requirements in the H&M Code of Conduct (Sustainability Commitment) before being approved for production. H&M then works closely with the suppliers, with continual follow-up and knowledge-building programmes to ensure compliance with the Code. H&M also supports the suppliers in their own development towards improved sustainability. H&M’s production offices are responsible for ensuring that each order is placed with the right supplier, that the products are manufactured at the right price and are of good quality, and that they are delivered at the right time. The production offices also check that manufacturing takes place under good working conditions.

Tests such as chemical and laundry tests are carried out on a continuous basis at the production offices and at external laboratories. The goods are subsequently transported to various distribution centres – primarily by sea and rail, but also by road and air. From there the goods are distributed directly to the stores and/or to regional replenishment centres.

The group achieves the best prices by having in-house designers, having no middlemen, utilising economies of scale, buying the right product from the right market, being cost-conscious in every part of the organisation and by having efficient logistics.

Sustainability
As a buyer and seller in many markets, the H&M group helps provide employment which lifts people and nations out of poverty. The jobs are created largely in the textile industry, primarily in Asia, where much of H&M’s sourcing takes place.

Sustainable growth is essential if the world is to achieve the global goals for socially, environmentally and economically sustainable development that the UN member countries unanimously adopted in 2015 and that are to be achieved by 2030. A starting point for the H&M group is that the business must contribute to these goals, which are summarised in Agenda 2030.

The group’s sustainability work includes environmental, ethical and human rights aspects, with the aim of contributing to social development, improving working conditions and minimising environmental impact. H&M actively pursues extensive work to bring about improvements throughout the life cycle of the products and in the communities where H&M operates. H&M uses its size and influence to help move this development in the right direction and to work for long-term improvements in human rights and the environment.

To make a real difference in the long term, H&M also works with external experts, innovators, other companies, NGOs and governments, including on important industry-wide issues such as health, safety, wages, water, the climate, chemicals, etc.

In 2016 the H&M group implemented a new sustainability strategy, with the vision of leading the change towards a sustainable fashion industry based on a fully circular approach and only renewable energy. The vision also includes working to achieve a fair, equal workplace both within the H&M group and among the suppliers, and to contribute to good communities based on diversity and inclusion.

Setting a good example, paving the way for new solutions, stimulating innovation and transparency and having a positive impact on people’s lives are all important parts of the new sustainability strategy. Through the strategy the H&M group will set long-term goals that are in line with scientific methods and in close cooperation with experts and other stakeholders within various areas. Thanks to its size, the H&M group has a unique reach and opportunity to drive forward structural changes towards increased sustainability throughout the whole fashion industry.

The H&M group’s sustainability work is an integral part of its business. This means that the sustainability work forms part of daily work in every area of the company and that each of the group’s departments is itself responsible for environmental and social matters, while the central sustainability department establishes the direction and overall targets for the company’s sustainability work as well as providing the departments with support on sustainability matters.

More information on H&M’s sustainability work can be found on pages 36–41 of the 2016 annual report and in H&M’s sustainability report that is published annually at hm.com.

Sales channels
The group sells its products from leased store premises and digitally, i.e. via online shopping. At year-end there were 64 store markets, of which 13 are operated on a franchise basis, and 35 H&M online markets.

The total number of stores at the end of the 2016 financial year was 4,351 – including 3,962 H&M stores, 194 COS stores, 118 Monki stores, 45 & Other Stories stores, 28 Weekday stores and 4 Cheap Monday
stores. Of the group’s total number of stores, 188 were franchise stores. H&M Home is in 269 H&M stores in more than 40 markets, and is also sold online in all H&M’s online markets.

COS and Monki have 19 online markets, while Weekday and Cheap Monday have 18 online markets. & Other Stories has 14 online markets.

Expansion and future development

The H&M group has a highly developed online business model, and today the group’s online sales already represent a significant share of total sales in several markets. The industry is in an exciting development phase and H&M is continuing with the investments that the group has been making for the past few years in areas such as digitalisation and infrastructure, particularly within the following focus areas:

– **Omni-channel strategy:** The H&M group has a clear omni-channel strategy that involves integrating the digital and physical worlds in order to offer customers a more seamless shopping experience. This includes online purchases and online returns in stores, click & collect, mobile payments, further development of the customer club and use of mobiles in stores for increased service.

– **Supply chain:** To make the supply chain even faster and more flexible investment is being made in technology such as RFID and automated warehouses. New delivery options have also been added for customers – such as next day delivery, which is now offered in five markets, and time-slot deliveries, which have begun in Japan.

– **Advanced data analytics:** Provide important support for operations, and the algorithms that the H&M group has started to use will contribute to improvements within everything from planning of the product range to logistics and sales.

The investments in these areas ensure that the H&M group is well-positioned for continued long-term and profitable growth. This also includes strong expansion both through new stores and new online markets.

In the light of this development, it is natural to rephrase the group’s growth target. This means that the previous target of increasing the number of stores by 10–15 percent per year will instead become a sales target that includes both stores and online sales. The new target which applies for the financial year of 2016/2017 and going forward is that the H&M group’s sales shall increase by 10–15 percent in local currencies per year with continued high profitability.

In 2017 the H&M group plans to open 430 new stores net and to add five new H&M store markets – Kazakhstan, Colombia, Iceland, Vietnam and Georgia – and six new H&M online markets – Turkey, Taiwan, Hong Kong, Macau, Singapore and Malaysia. Most of the new stores opened in 2017 will be H&M stores. Approximately 70 to 80 stores will be under the group’s other brands.

H&M Home is developing very well and has great potential for growth. Going forward, the group will therefore open standalone H&M Home stores and profile H&M Home even more as a standalone brand.

**Employees**

H&M’s business is to be characterised by a fundamental respect for the individual, where everyone is of equal value. This applies to everything from fair wages, reasonable working hours and freedom of association to the opportunity to grow and develop within the company. The company’s values, which have been in place since the days of H&M’s founder, Erling Persson, are based partly on the ability of the employees to use their common sense to take responsibility and use their initiative. Diversity among employees as regards age, gender, ethnicity, etc. is a valuable asset for the company.

H&M has grown significantly since its beginnings in 1947 and today has a presence in 64 markets. In 2016 more than 13,000 new jobs net were created within the H&M group. At the end of the year the group had just over 161,000 employees. The average number of employees in the group, converted into full-time positions, was 114,586 (104,634), of which 8,933 (8,061) were employed in Sweden.

Around 75 percent of the average number of employees were women and 25 percent were men. Of the positions of responsibility within the company, such as store managers and country managers, women held 69 percent and men 31 percent of the positions.

**EVENTS AFTER THE CLOSING DATE**

As previously communicated, sales including VAT in December 2016 increased by 6 percent in local currencies for the H&M group compared to the same month the previous year. Converted into SEK the increase was 10 percent.

The H&M group’s sales including VAT in the period 1 January to 29 January 2017 increased by 11 percent in local currencies compared to the same period the previous year. For January as a whole there is a negative calendar effect of approximately 2 percentage points, which occurs at the end of the month.

The group’s growth target has been rephrased. This means that the previous target of increasing the number of stores by 10–15 percent per year will instead become a sales target that includes both stores and online sales. The new target that applies for the financial year of 2016/2017 and going forward is that the H&M group’s sales shall increase by 10–15 percent in local currencies per year with continued high profitability.

**RISKS AND UNCERTAINTIES**

Some risks may be due to events in the outside world and affect a certain sector or market, while others are associated with the group’s own business. H&M carries out regular risk analysis for both operational and financial risks. Operational risks are mainly associated with the business and the external risks that affect the group. Some can be managed through internal routines and in some cases the group can influence the likelihood of a risk-related event occurring. Other risks are determined to a greater extent by external factors.

If a risk-related event is beyond the company’s control, work is aimed at alleviating the consequences.

There are risks and uncertainties affecting the H&M group that are related to fashion, weather conditions, macroeconomics and geopolitical events, sustainability issues, foreign currencies, taxes and various regulations, but also in connection with expansion into new markets, the launch of new concepts and how the brand is managed.

A description of H&M’s operational and financial risks is given below, with more detailed information concerning financial risks being given in note 2, Financial risks.

**OPERATIONAL RISK**

**Reputational risk**

As one of the world’s leading fashion companies H&M attracts great interest and is constantly in the spotlight. To safeguard and manage the brands it is important that the H&M group continues to be developed and run according to its strong values, which are characterised by high business ethics.

It is of the utmost importance that the H&M group lives according to the high aims set out in its policies and guidelines on business ethics. Should H&M fail in this respect, there is a risk that the company’s
To ensure that H&M products are of good quality and are produced under good working conditions, there is a programme of continual follow-up and knowledge building to ensure compliance with H&M’s Code of Conduct (Sustainability Commitment). H&M’s training and follow-up of its anti-corruption code, the Code of Ethics, is also an important part of ensuring that employees and suppliers live up to H&M’s strict requirements regarding business ethics.

**FINANCIAL RISKS**

**Foreign currencies**

Nearly half of the group’s sales are made in euros, and the most significant currencies for the group’s purchasing are the US dollar and the euro. Fluctuation in the US dollar/euro exchange rate is the single largest foreign currency transaction exposure for the group. Large and rapid exchange rate fluctuations, particularly as regards the USD as a sourcing currency, may also have a significant effect on purchasing costs, even if this may be regarded as relatively competition-neutral over time.

To hedge flows of goods in foreign currencies and thereby reduce the effects of future exchange rate fluctuations, payments for the group’s flows of goods – i.e. the group’s purchases of goods and in the majority of cases also the corresponding foreign currency inflows from the sales companies to the central company H & M Hennes & Mauritz GBC AB – are hedged under forward contracts on an ongoing basis.

In addition to the effects of transaction exposure, translation effects also impact the group’s results. These effects arise due to changes in exchange rates between the local currencies of the various foreign sales companies and the Swedish krona compared to the same period the previous year. The underlying profit/loss in a market may be unchanged in the local currency, but when converted into SEK may increase if the Swedish krona has weakened or decrease if the Swedish krona has strengthened.

Translation effects also arise in respect of the group’s net assets on consolidation of the foreign sales companies’ balance sheets. No exchange rate hedging (known as equity hedging) is carried out for this risk. For more information on financial risks see note 2, Financial risks.

**Trade intervention**

Purchasing costs may be affected by decisions at a national level on export/import subsidies, customs duties (see more below), textile quotas, embargoes, etc. The effects primarily impact customers and companies in individual markets. Global companies with operations in many countries are affected to a lesser extent, and among global corporations trade interventions may be regarded as largely competition-neutral.

Current changes in administrative rules relating to customs around the world mean increased challenges in the area as regards the application of customs legislation. H&M provides the customs authorities with relevant information on an ongoing basis in order to ensure customs values are managed correctly and to facilitate trade in accordance with the rules of the WTO Customs Valuation Agreement.

**Taxes**

For multinational companies today’s global environment involves complex tax risks, such as the risk of double taxation and tax disputes. As a large global company, H&M closely monitors developments in the field of tax. H&M is present in many countries and through its operations contributes to the community via various taxes and levies such as corporate tax, customs duties, income taxes and indirectly via VAT on the clothes sold to consumers.

H&M complies with national and international tax legislation, and always pays taxes and levies in accordance with local laws and

---

**Fashion**

Operating in the fashion industry is a risk in itself. Fashion has a limited shelf-life, and there is always a risk that some part of the collections will not be well received by customers. Fashion purchases are often emotional and may therefore be negatively affected by unforeseen geopolitical and macroeconomic events.

Within each concept it is important to have the right volumes and the right balance in the mix between fashion basics and the latest trends. In summary, each collection must achieve the best combination of fashion, quality, price and sustainability.

To optimise fashion precision, the group buys items on an ongoing basis throughout the season. Fashion is becoming increasingly global, but shopping patterns vary between different markets and sales channels. The start of a season and the length of that season can vary from country to country, for example. Delivery dates and product volumes for the various markets and channels are therefore adjusted accordingly.

**Weather**

The H&M group’s products are purchased for sale based on normal weather patterns. Deviations from normal weather conditions affect sales. This is particularly true at the transition between two seasons, such as the transition from summer to autumn or from winter to spring. If the autumn is warmer than usual it may have a negative effect on sales of weather-related garments in particular, such as outerwear and chunky knitwear.

**Negative macroeconomic changes and geopolitical risks**

One or more markets may be affected by events that have a negative effect on the macroeconomic situation or geopolitical environment in the country. These changed macroeconomic or geopolitical circumstances, such as political instability and sudden negative events in one or more countries, may result in rapid changes in the business environment and in economic downturn, which is likely to change consumer purchasing behaviour and thus negatively impact the group’s sales.

Uncertainties also exist concerning how external factors such as foreign currencies (see below), raw materials prices, transport costs and suppliers’ capacity will affect buying costs for the group’s products. There are also risks associated with social tensions in sourcing markets, which may lead to instability for the suppliers and in manufacturing and deliveries.

The group therefore needs to monitor such changes closely and have strategies in place to deal with fluctuations as advantageously as possible for both the company and external stakeholders.

**Sustainability risk**

There are a number of risks associated with sustainability issues in practically every sector. These sustainability risks may be related to factors such as climate change, dwindling natural resources, working conditions, corruption and politically unstable sourcing markets. H&M works actively to support social development, to run its operations ethically, to be climate smart and to use natural resources responsibly. Among other things, H&M uses its size and influence to help move this development in the right direction and to work for long-term improvements in human rights and the environment.

To ensure that H&M products are of good quality and are produced under good working conditions, there is a programme of continual follow-up and knowledge building to ensure compliance with H&M’s Code of Conduct (Sustainability Commitment). H&M’s training and follow-up of its anti-corruption code, the Code of Ethics, is also an important part of ensuring that employees and suppliers live up to H&M’s strict requirements regarding business ethics.

---

**Taxes**

For multinational companies today’s global environment involves complex tax risks, such as the risk of double taxation and tax disputes. As a large global company, H&M closely monitors developments in the field of tax. H&M is present in many countries and through its operations contributes to the community via various taxes and levies such as corporate tax, customs duties, income taxes and indirectly via VAT on the clothes sold to consumers.

H&M complies with national and international tax legislation, and always pays taxes and levies in accordance with local laws and
The board considers it of the utmost importance that senior executives are paid competitive, attractive remuneration at a market level, as regards both fixed and variable compensation, based on responsibilities and performance. The board’s proposed remuneration is in the best interests of the company and its shareholders from a growth perspective, since it helps motivate and retain talented and committed senior executives.

Like the guidelines adopted at the 2015 and 2014 annual general meetings, the board’s proposal to the 2016 annual general meeting for guidelines for remuneration of senior executives is divided into two parts: general guidelines and supplementary guidelines.

The general guidelines are aimed at a group of around 50 senior executives and are based on performance in the previous year, linked to certain quantifiable targets set in advance. The supplementary guidelines are aimed at some of these individuals. The supplementary guidelines are based on performance compared with targets set, but are also conditional upon the senior executive remaining employed by the H&M group for at least five years.

The board’s reasoning for the supplementary guidelines is as follows: in view of H&M’s strong expansion and the important stage of development that H&M is at, including multi-brand and multi-channel developments, the aim is to ensure that these key individuals in senior positions remain with the H&M group during this important development phase.

Below is a more detailed account of the board’s proposal to the 2016 AGM for guidelines:

**General guidelines**

The term “senior executives” covers the CEO, other members of executive management, country managers and certain key individuals.

The number of individuals covered by the term senior executives is currently around 50.

Compensation for senior executives is based on factors such as work tasks, expertise, position, experience and performance. Senior executives are compensated at what are considered by the company to be competitive market rates. Senior executives are also entitled to the benefits provided under the H&M Incentive Program.

H&M is present in nearly 50 countries excluding franchise markets and levels of compensation may therefore vary from country to country. Senior executives receive a fixed salary, pension benefits and other benefits such as healthcare and car benefits. The largest portion of the remuneration consists of the fixed salary. For information on variable components, see the section below.

In addition to the ITP plan, executive management and certain key individuals are covered by either a defined benefit or defined contribution pension plan. The retirement age for these individuals varies between 60 and 65 years. Members of executive management and country managers who are employed by a subsidiary abroad are covered by local pension arrangements and a defined contribution plan. Other than the ITP plan, no defined benefit pension plans have been taken out for executive management since 2005. The retirement age for these is in accordance with local retirement age rules. The cost of these commitments is partly covered by separate insurance policies.

The period of notice for senior executives varies from three to twelve months. No severance pay agreements exist within H&M other than for the CEO.

**Pension terms etc. for the CEO**

The retirement age for the CEO is 65. The CEO is covered by the ITP plan and a defined contribution plan. The total pension cost shall amount in total to 30 percent of the CEO’s fixed salary. The CEO is entitled to 12 months’ notice. In the event that the company cancels the CEO’s employment contract, the CEO will also receive severance pay of an extra year’s salary.

**Variable remuneration**

The CEO, country managers, certain senior executives and certain key individuals are included in a bonus scheme. The size of the bonus per person is based on the fulfilment of targets in their respective areas of
responsibility. The result is linked to the measurable profit targets (qualitative, quantitative, general, individual) set in advance within their respective areas of responsibility. These targets also include measurable targets for sustainability. The targets within each area of responsibility are aimed at promoting H&M’s development in both the short and the long term.

For the CEO the maximum bonus is SEK 0.9 m net after tax. For other senior executives the maximum bonus is SEK 0.3 m net after tax. Net after tax means that income tax and social security costs are not included in the calculation. The bonuses that are paid out must be invested entirely in shares in the company, which must be held for at least five years. Since H&M is present in markets with varying personal income tax rates, the net model has been chosen because it is considered fair that the recipients in the different countries should be able to purchase the same number of H&M shares for the amounts that are paid out.

In individual cases other members of executive management, key individuals and country managers may, at the discretion of the CEO and the chairman of the board, receive one-off payments of up to a maximum of 30 percent of their fixed yearly salary.

Supplementary guidelines
In addition to the general guidelines, the board has prepared supplementary guidelines for certain managers and other key individuals, such that these individuals are covered by both the general guidelines and the supplementary guidelines. The CEO is not, however, included in the supplementary guidelines.

Remuneration according to the supplementary guidelines is based on performance compared with targets set, but is also conditional upon the senior executive remaining employed by the H&M group for at least five years. The five-year rule applies with effect from the year that the annual general meeting adopted the arrangement – which was at the annual general meeting in spring 2014 – up to and including the month of May five years later, i.e. in 2019.

Provided that the abovementioned criteria are met, the senior executives covered by the supplementary guidelines are thus entitled to a cash payment after five years.

At individual level, the cash payment may vary between SEK 0.5 m and SEK 5 m net after tax; the exact distribution per individual will be decided by the CEO and the chairman of the board.

Cost to H&M: The total cost to the company is estimated at around SEK 30 m per year including social security costs over five years.

Miscellaneous
The board of directors may deviate from the guidelines for remuneration of senior executives in individual cases where there is a particular reason for doing so.

Where a board member performs work for the company in addition to his or her board work, a separate fee may be paid for this. This also applies if the work is performed by a company wholly or partly owned by the board member.

THE BOARD’S PROPOSALS TO THE 2017 AGM FOR GUIDELINES FOR REMUNERATION OF SENIOR EXECUTIVES

The board is proposing the following guidelines for remuneration of senior executives to the annual general meeting on 10 May 2017.

The board considers it of the utmost importance that senior executives are paid competitive remuneration at a market level, as regards both fixed and variable compensation, based on responsibilities and performance. The board’s proposed remuneration is in the best interests of the company and its shareholders from a growth perspective, since it helps motivate and retain talented and committed senior executives.

Guidelines for remuneration of senior executives were re-examined in conjunction with the review of the organisation and its composition carried out in 2016. Below are the board’s proposed new guidelines for senior executives, which in addition to the CEO include members of the executive management team and those responsible for other group-wide functions; overall, this amounts to nearly 20 individuals.

The guidelines are based on industry comparisons.

Senior executives shall be compensated at what are considered by the company to be competitive market rates. The criteria used to set levels of compensation shall be based partly on the significance of the duties performed and partly on the employee’s skills, experience and performance. Over time, the largest portion of the total remuneration shall consist of the fixed salary. The forms of compensation shall motivate senior executives to do their utmost to ensure the good financial and sustainable development of the H&M group.

The total annual remuneration may consist of the following components:
- fixed basic salary
- short-term variable remuneration
- long-term variable remuneration
- pension benefits
- other benefits

Fixed basic salary
Senior executives shall have a fixed basic cash salary that is at a market level based on each position’s significance for the company as a whole. The basic salary shall reflect the individual’s area of responsibility, skills and experience and requires the individual to work in a committed manner at a high professional level.

Variable remuneration
There shall be a clear link between the level of variable remuneration paid and the H&M group’s financial and sustainable development. From time to time, therefore, senior executives are entitled to variable remuneration that depends on the fulfilment of targets – which includes group-wide financial targets such as pre-set targets for profits and sales, sustainability targets, and individual targets within that person’s area of responsibility. The targets are aimed at promoting the H&M group’s development in both the short and the long term.

At individual level it is the position’s significance and opportunity to influence the overall development of the group that decides the level of the variable remuneration. The CEO decides the maximum possible outcome for each position, but always within the framework of these guidelines. Variable remuneration is not paid if the individual has given notice to terminate his/her employment.

The variable remuneration may consist of:

Short-term variable remuneration, which is the possibility of a cash payment provided that the target criteria that were set in advance for both the group and the individual have been fulfilled. Half of the payment shall be invested in H&M shares that must be held for at least three years. Short-term variable remuneration must never exceed the fixed basic salary for each individual.
Long-term variable remuneration, which is based on performance relative to set targets, but is also conditional upon the senior executive remaining employed within the H&M group for at least five years. The board’s reasoning is – in view of H&M’s strong expansion and the important stage of development that H&M is at, including within multi-brand and omni-channel developments – to ensure that these key individuals in senior positions remain with the H&M group during this important development phase. The five-year rule applies with effect from the year that the annual general meeting adopted this rule, which was at the annual general meeting in spring 2014 (when it was referred to as supplementary guidelines) up to and including the month of May five years later, i.e. in 2019. At individual level, the remuneration may vary between SEK 0.5 m and SEK 5 m net after tax; the exact distribution per individual will be decided by the CEO and the chairman of the board. The total cost to the group is estimated at around SEK 30 m per year including social security costs over five years.

In addition to this, in a few cases senior executives may, at the discretion of the CEO and the chairman of the board, receive one-off payments of up to an extra year’s fixed basic salary. Discretionary one-off amounts may also be paid to other key individuals.

Pension benefits
By far the majority of senior executives are covered by a premium-based pension plan, in addition to the ITP plan. Other than the ITP plan, no defined benefit pension plans have been taken out for senior executives since 2005. The retirement age for senior executives varies between 60 and 65 years. The cost of these commitments is partly covered by separate insurance policies.

Other benefits
Senior executives receive other benefits such as healthcare and car allowances. Senior executives are also entitled to the benefits accruing under the profit-sharing programme known as the H&M Incentive Program, which is for all employees of the H&M group.

Information concerning the CEO
The retirement age for the CEO is 65. The CEO is covered by the ITP plan and a defined contribution plan. The total pension cost shall amount in total to 30 percent of the CEO’s fixed basic salary. The CEO is entitled to 12 months’ notice. In the event that the company cancels the CEO’s employment contract, the CEO will also receive severance pay of an extra year’s salary.

The board of directors sets the CEO’s total remuneration. The CEO is not included in the long-term variable remuneration, i.e. what was previously referred to as supplementary guidelines.

Other
The period of notice for senior executives varies from three to twelve months.

The board of directors may deviate from the guidelines for remuneration of senior executives in individual cases where there is a particular reason for doing so.

Where a board member performs work for the company in addition to his or her board work, a separate fee may be paid for this. This also applies if the work is performed by a company wholly or partly owned by the board member.

DIVIDEND POLICY AND PROPOSED DIVIDEND
H&M’s financial goals are to enable the company to continue enjoying good growth and to be ready to exploit business opportunities. It is essential that, as in the past, the expansion proceeds with a continued high degree of financial strength and continued freedom of action.

Based on this policy, the board of directors has decided that the total dividend should equal about half of the profit after tax. In addition, the board may propose that any surplus liquidity is also distributed.

The board of directors has decided to propose a dividend of SEK 9.75 (9.75) per share to the annual general meeting on 11 May 2017, corresponding to 87 percent (77) of the profit after tax.

Many companies in the US and Europe divide their dividends into quarterly or semi-annual payments. In Sweden, too, there are larger companies which pay their dividend in more than one instalment. Until now H&M has paid its dividends in conjunction with the annual general meeting in the spring. H&M’s board of directors is to propose to the annual general meeting that the dividend is paid out semi-annually in the future, i.e. one instalment in the spring and one in the autumn, since this is more cost efficient for the company and also simplifies liquidity planning during the year.

The record date proposed for the first dividend payment of SEK 4.90 per share is 12 May 2017. This would then be paid out on 17 May 2017.

The record date proposed for the second dividend payment of SEK 4.85 per share is 14 November 2017. This would then be paid out on 17 November 2017.

PROPOSED DISTRIBUTION OF EARNINGS
At the disposal of the annual general meeting: SEK 16,562,033,368

The board of directors proposes a dividend of SEK 9.75 per share SEK 16,136,952,000

To be carried forward as retained earnings SEK 425,081,368

SEK 16,562,033,368

The board of directors is of the opinion that the proposed distribution of earnings is justifiable taking into consideration the financial position and future freedom of action of the group and the parent company, and observing the requirements that the nature and extent of the business, its risks and future expansion plans impose on the group’s and the parent company's equity and liquidity.

COMMENTS ON PROFITS
2016 was an eventful year which included many positive things, but also challenges both for the H&M group and for the industry. The year was characterised by the shift in the industry towards an ever growing online market and by digitalisation. For fashion retail in general, 2016 was at the same time a challenging year in which various external factors – including geopolitical events - had a negative impact on retail trade in many markets.

During the year the H&M group opened 427 new stores net worldwide and added three new store markets, Puerto Rico, New Zealand and Cyprus, while H&M's online store was opened in 11 new markets. This means that H&M is now present in 64 markets, of which 35 offer e-commerce.

The group’s sales increased by 7 percent in local currencies to SEK 223 billion, which is the highest annual turnover to date. The increase in sales was lower than planned, however, which led to increased mark-downs; combined with a strong US dollar, this made the group's purchases more expensive. Altogether, this had a negative impact on profit for the full year – although profits improved in the fourth quarter. Profit for the financial year after financial items amounted to SEK 24,039 m (27,242).

The H&M group's online business developed very well for all the brands, both as regards sales and profitability, which was positive. From an already high level, the group took further market share – which clearly proves that the investments in the online business have been successful. COS, & Other Stories, Monki, Weekday and H&M Home had strong online sales growth as well as very good store sales.

TAX
The H&M group's final tax rate for the 2015/2016 financial year was 22.5 percent (23.3). The final outcome of the tax rate for the year depends on the results of the group’s various companies, the corporate tax rates in each country and any additional taxes relating to previous years. The H&M group’s tax rate for the 2016/2017 financial year is expected to be 22.5 – 23.5 percent. However, in the first three quarters of 2017 an estimated tax rate of 23.5 percent will be used.

80
FINANCIAL POSITION AND CASH FLOW

The H&M group remains in a strong financial position. The group’s equity/assets ratio was 62.1 percent (67.6) and the share of risk-bearing capital was 67.1 percent (72.7).

Shareholders’ equity apportioned on the outstanding 1,655,072,000 (1,655,072,000) shares as of 30 November 2016 was SEK 37.00 (35.07).

Liquidity management

In 2016 the longest investment period was four months. The group does not use any derivative instruments in the interest-bearing securities market, nor does it trade in shares or similar instruments. See also note 2, Financial risks.
Group changes in equity

Since there are no minority interests, all shareholders’ equity is attributable to the shareholders of the parent company H & M Hennes & Mauritz AB.

Notes to the financial statements

Corporate information
The parent company H & M Hennes & Mauritz AB (publ) is a limited company domiciled in Stockholm, Sweden. The parent company’s corporate identity number is 556042-7229. The company’s shares are listed on the Stockholm stock exchange, Nasdaq Stockholm.

The group’s business consists mainly of sales of clothing, accessories, footwear, cosmetics and home textiles to consumers. The company’s financial year runs from 1 December to 30 November. The annual report was approved for publication by the board of directors on 30 January 2017 and will be submitted to the annual general meeting for approval on 10 May 2017.

Ramsbury Invest AB’s holding of shares in H & M Hennes & Mauritz AB represents 36.3 percent of all shares and 69.0 percent of the total voting power. Ramsbury Invest AB (556423-5769) is thus formally the parent company of H & M Hennes & Mauritz AB.

1. ACCOUNTING PRINCIPLES
Basis for preparation of the accounts
The consolidated accounts have been prepared in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and the interpretations provided by the IFRS Interpretations Committee. Since the parent company is a company within the EU, only IFRS approved by the EU are applied. The consolidated accounts also contain disclosures in accordance with the Swedish Financial Reporting Board’s recommendation RFR 1, Supplementary Accounting Rules for Groups.

The financial statements are based on historical acquisition costs, apart from certain financial instruments which are reported at fair value.

The parent company’s functional currency is Swedish kronor, which is also the reporting currency for the parent company and for the group. Unless otherwise indicated, all amounts are reported in millions of Swedish kronor (SEK m).

Where relevant, accounting principles are described within each note.

Parent company
The parent company applies the Swedish Annual Accounts Act and the Swedish Financial Reporting Board’s recommendation RFR 2, Accounting for Legal Entities, which essentially means that IFRS is applied. In accordance with RFR 2, the parent company does not apply IAS 39 to the measurement of financial instruments and does not capitalise development expenditure (IAS 38.57). Due to the link between reporting and taxation, year-end appropriations and untaxed reserves are reported in the parent company’s financial statements.

Group contributions that the parent company receives from subsidiaries and provides to subsidiaries are reported under appropriations.

Changes in accounting principles and disclosure requirements
The accounting principles and disclosure requirements applied for 2015/2016 are the same as those applied in the previous year.

Future accounting principles and disclosure requirements
A number of new standards, revisions and interpretations of existing standards have been published but have not yet entered into force. Of these, only the standards below are expected to have any effect on the consolidated financial statements.

IFRS 9, Financial Instruments: Recognition and Measurement.
This standard is to be applied to annual reporting periods beginning on or after 1 January 2018, when it will replace IAS 39, Financial Instruments: Recognition and Measurement. The new standard has been comprehensively revised in various parts, including in respect of the recognition and measurement of financial assets and financial liabilities. The standard is divided into three parts: classification and measurement, hedge accounting and impairment.

IFRS 9 requires financial assets to be classified in three different measurement categories: amortised cost, fair value through other comprehensive income or fair value through profit or loss. The classification is made at the time the asset is initially recognised based on the characteristics of the asset and the company’s business model. In the case of financial liabilities, there are no significant changes compared to IAS 39. The main change is for liabilities measured at fair value. In this case the part of the change in fair value attributable to a change in the credit risk of the liability is to be presented in other comprehensive income rather than in profit or loss, unless this would create an accounting mismatch.

The second part relates to hedge accounting. IFRS 9 requires additional disclosures concerning risk management and the effects of hedge accounting. In the main, the new principles provide the conditions for a fairer picture of a company’s management of financial risks to be reported.

Finally, new principles have been introduced regarding impairment of financial assets using a model based on expected losses. One of the aims of the new model is that reservations for credit losses will be made at an earlier stage.

The group has begun its evaluation of the effects of the new standard.

IFRS 15, Revenue from Contracts with Customers – this standard applies to annual reporting periods beginning on or after 1 January 2018 (in the case of H&M, from the 2018/2019 financial year). The standard replaces all previously issued standards and interpretations dealing with revenue (i.e. IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfers of Assets from Customers and SIC-31 Revenue: Barter Transactions Involving Advertising Services).

IFRS 15 contains an overall model for reporting revenue arising from contracts with customers. The idea is that everything starts with an agreement between two parties concerning the sale of a good or service. Initially a customer agreement is to be identified, which generates an asset (rights, a promise that compensation will be received) and a liability (commitments, a promise to deliver goods/services) for the seller. Under the model the company then reports a revenue item and thereby demonstrates that the company is meeting a commitment to deliver promised goods or services to the customer.

H&M does not expect the standard to make any material difference to the group.

IFRS 16, Leases (not yet adopted by the EU). The standard applies to annual reporting periods beginning on or after 1 January 2019 and will supersede IAS 17, Leases, and its associated interpretations IFRIC 4, SIC-15 and SIC-27. The standard requires lessees to recognise assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. This is based on the approach that the lessee has a right to use an identified asset for a specific period of time and at the same time a liability to pay for this right. Recognition for lessors will essentially be unchanged.

The group has begun its evaluation of the new standard and expects it to result in recognition of material assets and liabilities associated with the group’s leases for premises. Since the standard will be applied for the first time to the 2018/2019 financial year, the judgement has been made that it is not yet possible to assess and calculate its effects on the figures with any certainty.

Estimates, assumptions and assessments
The preparation of the annual report and consolidated accounts requires
estimates and assumptions to be made, as well as judgments in the application of the accounting principles. These affect carrying amounts for assets, liabilities, income, expenses and supplementary information. The estimates and assumptions are based on historical experience, other relevant factors and expectations of the future and are reviewed regularly. The actual outcome may therefore deviate from the estimates and assumptions made. The sources of uncertainty that have been identified by H&M are the measurement of stock-in-trade and the measurement of current and deferred tax – see note 10 and note 14.

It is judged that, as at 30 November 2016, there are no such estimates or assumptions made in the financial statements that involve a significant risk of any material adjustment to the values of assets and liabilities in the forthcoming financial year, other than those mentioned above.

Consolidated accounts

Basis of consolidation

The consolidated accounts cover the parent company and its subsidiaries, and have been prepared according to the acquisition method. The financial reports for the parent company and the subsidiaries included in the consolidated accounts cover the same period and have been prepared in accordance with the accounting principles that apply to the group. Intra-group income, expenses, receivables and liabilities, as well as unrealised gains and losses, are eliminated entirely in the preparation of the consolidated accounts. All companies in which the group owns or controls more than 50 percent of the votes, or in which the group alone has a controlling interest through an agreement or otherwise, are consolidated as subsidiaries. Subsidiaries are included in the consolidated accounts from the date of acquisition, which is the date on which the parent company gains a controlling interest, and are included in the consolidated accounts until such date as the controlling interest ends.

Business combinations

In business combinations acquired assets and liabilities are identified and classified and are measured at fair value on the acquisition date. If the acquisition cost of the subsidiary’s shares exceeds the calculated value of the net identifiable assets of the acquired company at the time of acquisition, the difference is reported as goodwill upon consolidation. If the acquisition cost is less than the finally established value of the net identifiable assets, the difference is reported directly in the income statement. The minority interest in the case of acquisitions of less than 100 percent is determined for each transaction either as a proportionate share of the fair value of net identifiable assets or at fair value. Transaction costs associated with acquisitions are not included in the acquisition cost; instead these are expensed immediately.

Translation of foreign subsidiaries

The companies making up the group present their financial reports in the currency used in the economic environment in which the company concerned mainly operates, known as the functional currency. These reports form the basis of the consolidated accounts. The consolidated accounts are presented in Swedish kronor, which is the parent company’s functional currency and reporting currency. Assets and liabilities in foreign subsidiaries are translated at the exchange rate on the closing date, while the income statement is translated at the average exchange rate for the financial year. The translation difference arising from this, and also as a result of the fact that the net investment is translated at a different exchange rate at the end of the financial year than at the beginning of the financial year, is posted directly to equity as a translation reserve, via the statement of comprehensive income. On disposal of a foreign business the accumulated translation differences in the income statement are posted together with the profit or loss on disposal.

Foreign currency

Monetary assets and liabilities in foreign currencies are converted at the exchange rate on the closing date. Exchange rate differences arising on translation are reported in the income statement with the exception of exchange rate differences in respect of loans, which are to be regarded as net investment in a foreign business. Exchange rate differences of this type are posted to equity as translation differences via the statement of comprehensive income.

Interest income

Interest income is recognised as it is earned.

Other provisions

Provisions are reported in the balance sheet when there is an undertaking as a result of an event occurring and it is likely that an outflow of resources will be required for the undertaking and when the amount can be reliably estimated.

Cash flow statement

The cash flow statement is prepared according to the indirect method. The reported cash flow covers only transactions involving payments in or out.

2. FINANCIAL RISKS

The group’s financing and management of financial risk is carried out centrally within the group’s financial department in accordance with a financial policy established by the board of directors. The financial policy is the most important financial control tool for the company’s financial activities and establishes the framework within which the company works. The group’s accounting principles for financial instruments, including derivatives, are described in note 20.

In the course of doing business the group is exposed to risk associated with financial instruments, such as cash and cash equivalents, short-term investments, accounts receivable and accounts payable. The group also executes transactions involving currency derivatives for the purpose of managing currency risk that arises in the course of the group’s business.

The risks relating to these instruments are primarily the following:

– interest rate risk associated with cash and cash equivalents and short-term investments;
– currency risk associated with flows and financial assets in foreign currencies;
– credit risk associated with financial assets and derivative positions.

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will vary due to changes in market interest rates and that changes in market interest rates may affect net profit. The group’s exposure to risk from changes in interest rates relates to cash and cash equivalents, short-term investments and liabilities to credit institutions and for financial leases. The original term of the investments is up to three months as of the closing date. The financial policy permits investments of up to two years. The group’s cash and cash equivalents and short-term investments as of the closing date amounted to SEK 9,446 m (12,950). As of the closing date, liabilities to credit institutions and for financial leases amounted to SEK 2,340 m (0). The short term means that the
risk of changes in value is limited. An interest rate increase of 0.5 percentage points on these amounts would increase interest income from cash and cash equivalents and short-term investments by SEK 47 m (65), and would increase interest expense for external borrowing and financial leases by SEK 12 m (0). A corresponding decrease in the interest rate would reduce interest income by the same amount and would decrease interest expense related to liabilities to credit institutions and for financial leases.

Currency risk
Currency risk is, among other things, the risk that the value of financial instruments or future cash flows will vary due to changes in exchange rates.

Currency exposure associated with financial instruments
H&M's currency risk associated with financial instruments is mainly related to financial investments, accounts payable and derivatives. The group's accounts payable in foreign currencies are mainly handled in Sweden and are largely hedged through forward contracts. Based on this, a change in the value of the Swedish krona of 2 percent in relation to other currencies would result in an insignificant momentary effect on profit related to the financial instrument holdings as of the closing date. A 2 percent strengthening of the Swedish krona would have a positive effect on the hedge reserve in equity of around SEK 269 m (86) before taking into account the tax effect, of which SEK 316 m (178) relates to EUR and SEK -269 m (-233) to USD.

The group's exposure to outstanding derivative instruments is reported in note 17.

The group's operating result for the year was affected by exchange rate differences relating to flows of goods in the amount of SEK -63 m (-254).

Transaction exposure associated with commercial flows
The payment flows in the form of payments in foreign currencies for accounts receivable and payable expose the group to currency risk. To manage the currency risk relating to changes in exchange rates the group hedges its currency risk within the framework of the financial policy. The currency risk exposure is dealt with at central level. Most of the group's sales are made in euros, and the group's most significant purchase currencies are the US dollar and the euro. Fluctuation in the US dollar/euro exchange rate is the single largest transaction exposure within the group. To hedge the flows of goods in foreign currencies and thereby reduce the effects of future exchange rate fluctuations, 100 percent of the group's purchases of goods and the bulk of corresponding forecast inflows from the sales companies are hedged under forward contracts on an ongoing basis. The average term of outstanding forward contracts is around three months. Since the sole purpose of this currency management is to reduce risk, only exposure in the flow of goods is hedged.

Translation exposure on consolidation of units outside Sweden
In addition to the effects of transaction exposure, profits are also affected by translation effects as a result of changes in exchange rates for the local currencies of the various foreign subsidiaries against the Swedish krona, compared to the same period the previous year. The underlying profit/loss in a market may be unchanged in the local currency, but when converted into SEK may increase if the Swedish krona has weakened or decrease if the Swedish krona has strengthened. Translation effects affect the group's net assets on consolidation of the foreign subsidiaries’ balance sheets (translation exposure in the balance sheet). No exchange rate hedging (equity hedging) is carried out for this risk.

Credit risk
Investments are only permitted to be made in banks based in countries with a minimum rating of A- (according to Standard & Poor's long-term rating) and funds are only invested in banks with a minimum rating of A- (Standard & Poor's) and A3 (Moody's). The financial policy stipulates for various ratings the maximum amount that may be invested and the term for which it may be invested. Investments are only allowed in banks defined by Standard & Poor's or Moody's as having systemic importance in the country where they are based. Under Standard & Poor's rating model the bank shall have at least "moderate systemic importance" and under Moody's model the bank shall have at least "one-notch uplift for systemic support". No further investments shall be made in countries or banks which have the minimum allowed long-term rating and a negative outlook. Maximum credit exposure as of 30 November 2016 totalled SEK 16,189 m (18,540) and corresponds to the book value for cash and cash equivalents of SEK 9,446 m (12,950), accounts receivable of SEK 1,881 m (4,021) and other SEK 1,862 m (1,569). Accounts receivable are divided between a large number of customers with low amounts per customer. The average debt was around SEK 2,585 (2,330). Bad debts during the year from accounts receivable were insignificant.

Liquidity risk
In view of the group's good liquidity and good cash flow H&M utilised external borrowing to only a limited extent in 2016, and this on favourable terms.

3. SEGMENT REPORTING
The group's business consists mainly of sales of clothing, accessories, footwear, cosmetics and home textiles to consumers. Internal follow-up is carried out on a country by country basis by the CEO, who is the group’s chief operating decision maker. Each country is thus an operating segment. Since some countries have similar economic characteristics, such as long-term economic results, these may be combined in segment reporting in accordance with IFRS 8. H&M has combined countries to form the segments Asia & Oceania, Europe & Africa, and North & South America. The parent company and subsidiaries with no external sales are reported in a separate Group Functions segment. The same accounting principles are applied to segment reporting as in the consolidated accounts. Transactions between segments take place on normal commercial terms.
Operating results for each segment are based on how H&M tracks results internally within the group and may deviate from the fiscal result in each market.

The group’s property, plant and equipment amounted to SEK 38,693 m (32,962) as of 30 November 2016. The fixed assets are largely distributed between the countries in accordance with each country’s level of sales. In Sweden property, plant and equipment amounted to SEK 1,722 m (1,546) as of 30 November 2016.

4. NET SALES BY MARKET

The group’s income is generated mainly by the sale of clothing, accessories, footwear, cosmetics and home textiles to consumers. Sales revenue is reported less value-added tax, returns and discounts as sales excluding VAT in the income statement. Income from store and online sales is reported in conjunction with sale/delivery to the customer. Franchise sales have two components: sales of goods to franchisees, which are reported on delivery of the goods, and franchise fees, which are reported when the franchisee sells goods to the consumer.

The group’s income exhibits seasonal variations. The first quarter of the financial year is normally the weakest and the last quarter the strongest.

5. REVENUE FROM GROUP COMPANIES

The parent company’s internal sales consist of royalties of SEK 3,849 m (3,457) and other income of SEK 136 m (148) from group companies.
6. SALARIES, OTHER REMUNERATION AND SOCIAL SECURITY COSTS

** The negative social security and pension costs are due to actuarial changes in pension liability.

Board fees

Board fees paid for the year as approved by the 2015 AGM amounted to SEK 5,825,000 (5,525,000). Board fees were paid as follows:

- SEK
  - Stefan Persson, chairman: 1,550,000
  - Anders Dahlvig: 675,000
  - Lottie Knutson: 550,000
  - Susi Kvart: 675,000
  - Lena Patriksson Keller: 550,000
  - Melker Schörling: 550,000
  - Christian Sievert: 725,000
  - Niklas Zennström: 550,000

The fees were paid as resolved at the 2015 annual general meeting. This means that the fees related to the period until the next AGM was held; that is, for the period 29 April 2015 to 3 May 2016. The amounts were paid out after the 2016 AGM.

As of the AGM on 3 May 2016 the board consists of eight ordinary members elected by the AGM. There are also two employee representatives, with two deputies for these positions. Seven members of the board are women, five are men, and four of the 12 are employed by the company.

Board member Lena Patriksson Keller is the majority shareholder in Patriksson Communication AB, which had business relations with the company previously is taken into account in the qualification period, part-time. The number of years that the employee has worked for the company, basic principle – based on length of employment, either full-time or part-time. The number of years that the employee has worked for the company, basic principle – based on length of employment, either full-time or part-time. The number of years that the employee has worked for the company, basic principle – based on length of employment, either full-time or part-time. The number of years that the employee has worked for the company.

Remuneration of senior executives

Based on resolutions on guidelines adopted annually by the AGM – see the administration report on pages 75–76.

Remuneration of the chief executive officer

Remuneration paid to the CEO for the 2016 financial year in the form of salary and benefits amounted to SEK 13.4 m (15.0), which included variable remuneration of SEK 0 m (2.0). Pension benefits for the CEO are covered by a defined contribution plan and by the ITP plan. The combined pension expenses shall amount in total to 30 percent of the CEO’s fixed salary. Pension expenses amounted to SEK 4.0 m (3.9).

The retirement age for the CEO is 65.

The CEO is entitled to a 12-month period of notice. In the event that the company cancels his employment contract, the CEO will also receive severance pay of an extra year’s salary. The CEO’s terms of employment are determined by the board of directors.

The CEO is not covered by the supplementary guidelines on senior executives – see the administration report on page 76.

Pension for the former CEO

The former CEO retired on 1 September 2009. The total pension commitments entered as liabilities, which are based on the fact that the former CEO receives a pension for the first three years of his retirement equivalent to 65 percent of his fixed salary followed by a lifelong pension equivalent to 50 percent of the same salary, amount to SEK 141.3 m (142.1). The change in the year’s pension commitments entered as liabilities include actuarial losses of SEK 2.5 m (actuarial gains of SEK 16.6 m). Pension costs for the former CEO are included under “of which pensions to board, CEO, executive management”.

Remuneration of the executive management team

During the year the composition of the executive management was changed such that, in addition to the CEO, it now encompasses ten (16) individuals, of whom six are women. The executive management team consists of the CFO and the individuals responsible for the following group-wide functions: production, sustainability, expansion, communications, human resources, business development and logistics, as well as the person responsible for the H&M brand and the person responsible for new business (which includes the other brands such as COS, & Other Stories, Monki, Weekday, Cheap Monday and H&M Home).

Remuneration paid to members of the executive management team in the form of salary and benefits amounted to SEK 48.0 m (66.5), which included variable remuneration of SEK 9 m (6.4). In addition to this, an estimated expense of SEK 30.0 m (30.0) has been recognised in respect of remuneration that certain senior executives may receive in accordance with the supplementary guidelines – see further description in the administration report on page 76. This will be paid out no earlier than 2019, in accordance with the guidelines approved at the 2014 AGM. Pension expenses relating to other members of the executive management during the year amounted to SEK 15.1 m (24.9). There are rules in place for members of the executive management team with respect to supplements to retirement pension beyond the ITP plan. The retirement age varies between 62 and 65. The cost of this commitment is partially covered by separate insurance policies.

H&M Incentive Program (HIP)

An extraordinary general meeting held on 20 October 2010 resolved to introduce an incentive programme for all employees of the H&M group.

The programme was initiated by Stefan Persson and family through the donation of 4,040,404 H&M shares worth around SEK 1 billion to a Swedish foundation, Stiftelsen H&M Incentive Program.

All employees of the H&M group, regardless of their position and salary level, are included in the programme according to the same basic principle – based on length of employment, either full-time or part-time. The number of years that the employee has worked for the company previously is taken into account in the qualification period, which is five years unless local rules require otherwise. As a general rule, funds will begin to be paid out no earlier than the age of 62. However, it will also be possible for payments to be made after ten years of employment – but no earlier than 2021.
The 2013 annual general meeting resolved to change the basis of future contributions to HIP. The contribution is no longer linked to the increase in dividend; instead, contributions to HIP are based on 10 percent of the increase in the company’s profit after tax between two consecutive financial years. The increase in profit is calculated on profit after tax before any contribution to HIP. Thus when calculating the contribution to HIP for year 2, the year’s profit after tax is compared with year 1’s profit after tax before any contribution to HIP. This ensures that the two years are compared on a like-for-like basis; in other words, profit after tax before any contribution to HIP. The first contribution to HIP based on an increase in profit was made for the financial year which ended on 30 November 2013.

The contribution to HIP for a financial year is expensed in the year to which it relates. For example, if profit after tax in year 1 is 100 and profit after tax in year 2 is 130, then the contribution is 3 and will be expensed in year 2.

There is a ceiling that limits the size of the contribution when the increase in profit between two years may be deemed disproportionately large. The ceiling has been set at 2 percent of profit for the year after tax before any contribution to HIP.

The contributions to the foundation are to be invested in H&M shares. H&M has no other commitments beyond this.

In the consolidated accounts the costs of the incentive programme are recognised in accordance with the rules on short-term profit-sharing and bonus schemes set out in IAS 19. The expense will be recognised when the amount has been established and an obligation exists.

For 2016 no contribution was made to the incentive programme, based on the principle for contributions to HIP that was adopted at the 2013 AGM and is described above.

## 8. DEPRECIATION

Depreciation has been calculated at 12 percent of the acquisition cost of equipment and leasehold rights, and 20 percent for computer equipment and vehicles. Depreciation on brands and customer relations relating to FaBric Scandinavien AB and capitalised development expenditure is assessed at 10 percent of the acquisition cost. Buildings are depreciated at 3 percent of their acquisition cost. No depreciation is applied to land values. Depreciation for the year is reported in the income statement as follows:

10. TAX

Income taxes in the income statement represent current and deferred corporation tax payable by Swedish and foreign subsidiaries. Current tax is tax that will be paid or received in respect of the current year as well as adjustments to current tax attributable to previous periods. The income tax rate in force in each country is applied.

Deferred tax is calculated according to the balance sheet method based on temporary differences arising between reported and fiscal values of assets and liabilities. Deferred tax is calculated using the tax rates that are expected to apply in the period when the receivables are deducted or the liabilities are settled, based on the tax rates (and the tax legislation) in force on the closing date. Deferred tax receivables are recognised for all temporary differences unless they relate to goodwill or an asset or a liability in a transaction that is not a company acquisition and that, at the time of acquisition, affects neither the reported nor taxable profit or loss for the period. Also, temporary differences relating to investments in subsidiaries and associated companies are taken into account only to the extent it is likely that the temporary difference will be reversed in the foreseeable future. Deferred tax receivables for temporary differences and loss carryforwards are recognised only to the extent it is likely that these will be able to be utilised.

The carrying amounts of deferred tax receivables are tested as of each closing date and reduced where it is no longer deemed likely that they will be able to be utilised.

Global companies such as H&M are sometimes involved in tax proceedings of varying extent and at different stages. H&M continually evaluates tax proceedings in progress. Where it is likely that additional tax will have to be paid and the outcome can be reasonably estimated, the necessary reserve is made. As of the closing date, tax proceedings are in progress in some countries. H&M has made an assessment of the possible outcome and reserved the tax expense concerned. This assessment took account of aspects such as whether agreements on double taxation exist and whether there are differences between the tax rates in different countries.

Total recognised deferred tax receivable relates to:

Pension provisions: 161 136 42 43
Intangible fixed assets: 180 - - -
Property, plant and equipment: 266 250 - -
Loss carryforward in subsidiaries: 20 17 - -
Stock-in-trade: 921 946 - -
Hedging reserves: 62 - - -
Other temporary differences: 1,252 988 - -
Total: 2,862 2,338 42 43

Recognised deferred tax liabilities relate to:

Intangible fixed assets: 1,026 749
Property, plant and equipment: 1,586 1,237
Stock-in-trade: 366 336
Tax allocation reserve: 1,890 1,890
Hedging reserves: - 97
Other temporary differences: 30 69
Total: 4,858 4,378

As of the closing date, the group has no loss carryforward other than the recognised deferred taxes receivable.

11. INTANGIBLE FIXED ASSETS

Intangible fixed assets with a finite useful life are reported at acquisition cost less accumulated amortisation and any accumulated write-downs. Amortisation is distributed linearly over the assets’ expected useful life.

Development costs are capitalised to the extent that it is judged that the company will gain from future financial benefits and if the acquisition cost can be reliably calculated. The reported value includes the direct costs of services and materials acquired, as well as indirect costs attributable to the asset. Other development costs, as well as maintenance and training initiatives, are recognised as expenses in the income statement as they arise.

Goodwill is the amount by which the acquisition cost of the subsidiary’s shares exceeds the calculated value of the subsidiary’s net identifiable assets upon acquisition. Goodwill on acquisition of subsidiaries is reported as intangible assets. Intangible assets with an indefinite useful life, including goodwill, are tested for impairment annually or more often if there is an indication of a decline in value. If the book value of the asset exceeds the recoverable amount (the higher of the net realisable value and the value in use), the necessary amount is written down. Any write-down is recognised in profit/loss.

**Capitalised expenditure** refers mainly to IT-related investments. To a small extent these were taken into use during 2013-2016, whereupon amortisation was commenced for these parts. Significant parts of the projects will be taken into use within one to four years. Those projects that are not yet ready for use are tested for impairment annually. This year’s impairment testing of these projects did not result in any need for write-downs.

Cont. Note 11, Intangible fixed assets

A goodwill impairment test was carried out at the end of 2016. Significant assumptions used when testing goodwill for impairment are sales development and gross margin. The impairment test is based on a calculation of value in use. The value in use has been assessed based on discounted cash flows according to forecasts for the next five years and with an annual growth rate of 2 percent (2) in subsequent years. A discount rate of 14 percent (14) before tax was used. The cash flows are based on H&M’s business plan. The growth rate of 2 percent (2) is based on H&M’s assessment of the opportuni- ties and risks associated with the business. The discount rate is based on an average weighted capital cost that is estimated to be on a par with the external requirements that the market imposes for similar companies. No impairment was identified and H&M is of the opinion that reasonable possible changes in the variables above would not have such a significant impact that the recovery amount would be reduced to a lower amount than the carrying amount.

### 12. BUILDINGS, LAND AND EQUIPMENT

Costs relating to property, plant and equipment are reported in the balance sheet if it is likely that the company will gain from future financial benefits associated with the asset and if the asset’s acquisition cost can be reliably calculated. Other costs and costs relating to ongoing maintenance and repair are reported as an expense in the period in which they arise. Property, plant and equipment are reported at acquisition cost less accumulated depreciation and any accumulated write-downs. Depreciation is distributed linearly over the assets’ expected useful life. No depreciation is applied to land. The carrying amount of property, plant and equipment is tested for any indication of impairment. If the book value of the asset exceeds the recoverable amount (the higher of the net realisable value and the value in use), the necessary amount is written down. Any write-down is recognised in profit/loss.

---

* Brands, customer relations and goodwill assets were added through the acquisition in 2008 of the company FaBric Scandinavien AB, which is a cash-generating unit. H&M acquired the remaining 40 percent of the shares in FaBric Scandinavien AB at the end of November 2010.
13. PAYMENTS FOR OPERATING LEASES AND FINANCE LEASES

Leases are classified in the consolidated accounts as either finance or operating leases. Finance leases exist when the financial risks and benefits associated with the ownership of an asset are essentially transferred from the lessor to the lessee, regardless of whether the legal ownership lies with the lessor or the lessee. Assets held under finance leases are reported as fixed assets and future payment commitments are reported as liabilities in the balance sheet. On initial recognition, the asset and liability are reported at the net present value of future minimum lease payments and any residual value.

On subsequent occasions, the expense is distributed between an interest portion and a repayment portion. All other rental agreements that do not fulfil the conditions for classification as finance leases are deemed to be operating leases. Lease charges paid under operating leases are expensed over the lease period using the straight-line method. Significant write-downs are rare. There were no finance leases in 2015.

Operating leases

The group has leases relating to rented premises which were entered into on normal market terms. Most of the agreements contain options to extend the term. Rental costs for the 2016 financial year amounted to SEK 32,165 m (20,554), of which sales-based rent amounted to SEK 3,853 m (2,983).

Rent according to the group’s rental agreements (basic rent excluding any sales-based rent) amounts to:

<table>
<thead>
<tr>
<th>Rental commitments in next twelve months</th>

<td>23,820</td>
<td>28,965</td>
</tr>
<tr>
<td>Total</td>
<td>81,493</td>
<td>85,323</td>
</tr>
</tbody>
</table>

As of 30 November 2016, expenses attributable to finance leases including depreciation, were charged to earnings for the group in the amount of SEK 0 m (0) as well as interest expenses of SEK 0 m (0).

14. STOCK-IN-TRADE

Stock-in-trade is valued at the lower of the acquisition cost and the net realisable value. From the moment the goods are transferred from the supplier to the transport service provider appointed by H&M, the goods are owned according to civil law by H&M and become part of H&M’s reported stock-in-trade. The net realisable value is the estimated market value less the calculated selling expenses.

Goods that have not yet arrived at a store are valued at their actual acquisition cost including the estimated cost of customs duties and freight. For stock in the stores the acquisition cost is determined by reducing the selling price by the calculated gross margin (retail method). The composition of the stock-in-trade as of the closing date is judged to be good, but the stock level is assessed as being too high. Significant write-downs are rare. There were no material write-downs in the current or previous financial years. Only an insignificant part of the stock-in-trade is measured at net realisable value. The stock-in-trade is not considered to have any material degree of obsolescence.

</tbody>
</table>

Investments are made on market terms and the interest rates are between 0.00 and 10.25 percent. The difference in interest rate depends mainly on the currency in which the funds are invested. In the case of cash and cash equivalents for the parent company, cash pool accounts in the comparison figures were reclassified from cash and cash equivalents to intra-group balances.

17. FORWARD CONTRACTS
All changes in the value of derivatives are recognised initially in equity as a hedging reserve through other comprehensive income. Through other comprehensive income, the fair value is transferred from the hedging reserve to the income statement in conjunction with a hedged transaction taking place.

The table below shows the outstanding forward contracts for cash flow hedging as of the closing date:

Total | -328 | 405 | 56,052 | 36,914 |

At the closing date, forward contracts with a positive market value amount to SEK 848 m (707), which is reported under other current receivables. Forward contracts with a negative market value amount to SEK 1,176 m (302), which is reported under other current liabilities. Of the outstanding forward contracts, losses of SEK -69 m (gains 87) were transferred to the income statement when hedged transactions occurred for these contracts. The residual fair value of SEK -259 m (318) is included in the hedging reserve in equity.

Regarding measurement see note 20.

18. SHARE CAPITAL
The share capital is divided between 194,400,000 class A shares (ten votes per share) and 1,460,672,000 class B shares (one vote per share). There are no other differences between the rights associated with the shares. The total number of shares is 1,655,072,000. The dividend paid per share in 2016 was SEK 9.75.

The group’s managed capital consists of shareholders’ equity. The group’s goal with respect to managing capital is to enable good growth to continue and to be prepared to exploit business opportunities. It is essential that, as in the past, the expansion is able to proceed with a continued high degree of financial strength and continued freedom of action. In view of this, the board of directors has established a dividend policy whereby the dividend should equal around half of the profit for the year after tax. In addition, the board may propose that any surplus liquidity is also distributed. H&M meets the capital requirements set out in the Swedish Companies Act.

There are no other external capital requirements.
19. PROVISIONS FOR PENSIONS

H&M has several different plans for benefits after employment has ended. The plans are either defined benefit or defined contribution plans. Defined contribution plans are reported as an expense in the period when the employee performs the service to which the benefit relates. Defined benefit plans are assessed separately for the respective plan based on the benefits earned during the previous and current periods. The defined benefit obligations less the fair value of managed assets are reported under the heading Provisions for pensions. In the case of the Swedish entities, the actuarial calculations also cover future payments of special payroll tax. Defined benefit plans are primarily found in Sweden, but also in the UK, Norway, Switzerland, Spain and Germany. Pension obligations are assessed annually with the help of independent actuaries according to the so-called Projected Unit Credit Method. The assessment is made using actuarial assumptions. These assumptions include such things as the discount rate, anticipated salary and pension increases as well as the expected return on managed assets. Changes in the actuarial assumptions and outcomes that deviate from the assumptions give rise to actuarial gains or losses. The actuarial gains and losses arising are mainly due to the financial assumptions, such as changes in the discount rate. Such gains or losses are recognised in other comprehensive income in the year they arise.

For salaried employees in Sweden, H&M applies the ITP plan through insurance policies with Alecta and Collectum, i.e. ITP 2 and ITP 1. According to statement UFR 3 from the Swedish Financial Reporting Board, this is a defined benefit plan that covers a number of employers. The plan will be reported as a defined contribution plan until the company gains access to information that allows this plan to be reported according to the rules for defined benefit plans. The ITP 1 plan is a defined contribution plan.

Alecta’s surplus cannot be allocated to the insured employer and/or the insured employees. As of 30 September 2016, Alecta’s consolidation ratio was 142 percent (148). The consolidation ratio is calculated as the fair value of managed assets as a percentage of the obligations calculated in accordance with Alecta’s actuarial assumptions. This calculation is not in line with IAS 19.

The fair value of all financial assets and liabilities essentially corresponds to the book value. Assets and liabilities that are recognised at amortised cost have short remaining terms, making the difference between book value and fair value negligible.

Financial instruments recognised in the balance sheet include on the assets side cash and cash equivalents, accounts receivable, short-term investments, long-term receivables and derivatives. On the liabilities side are accounts payable and derivatives. Financial instruments are reported in the balance sheet when the group becomes a party to the contractual terms of the instrument. Financial assets are removed from the balance sheet when the contractual rights to the cash flows from the asset cease. Financial liabilities are removed from the balance sheet when the obligation is met, cancelled or ends.

Financial assets and liabilities at fair value through profit or loss
This category consists of two sub-groups: financial assets and liabilities held for trading, and other financial assets and liabilities that the company initially chose to place in this category when they were first recognised. Assets and liabilities in this category are assessed continually at fair value, with changes in value recognised in profit/loss. No financial assets or liabilities have been classified in this category.

Loans receivable and accounts receivable
This category primarily covers cash and bank balances as well as accounts receivable. Cash and bank balances are valued at amortised cost. Accounts receivable have a short expected term and are recognised at the original invoiced amount without discount, with deductions for doubtful receivables.

Financial assets held to maturity
Financial assets held to maturity are assets with payment flows that are fixed or that can be established in advance and with a fixed term which the group has the express intention and capacity to hold until maturity. Assets in this category are valued at amortised cost, with the effective interest rate being used to calculate the value. As of the closing date, all of the group’s short-term investments fell into this category.

Other financial liabilities
Financial liabilities that are not held for trading are valued at amortised cost. Accounts payable fall into this category. These have a short expected term and are recognised at the nominal amount with no discounting.

Reporting of derivatives used for hedging purposes
All derivatives are reported initially and continually at fair value in the balance sheet.

The group’s policy is for derivatives to be held for hedging purposes only. Derivatives comprise forward currency contracts used to hedge the risk of exchange rate fluctuations for internal and external flows of goods.

To meet the requirements of hedge accounting there must be a clear link to the hedged item. In addition, the hedge must effectively protect the hedged item, hedge documentation must have been prepared and the effectiveness must be measurable.

In hedge accounting, derivatives are classified as cash flow hedging or as fair value hedging. In the past financial year and the previous financial year all of the group’s derivatives were in the cash flow hedging category. How these hedging transactions are reported is described below.

Hedging of forecast currency flows – cash flow hedging
Derivatives that hedge the forecast flow are reported in the balance sheet at fair value. Changes in value are reported in equity as a hedging reserve, through other comprehensive income, until such time as the hedged flow is recognised in the operating profit. At which time the hedging instrument’s accumulated changes in value are transferred to the income statement where they then correspond to the profit/loss effects of the hedged transaction.

The category derivatives for hedging recognised at fair value is measured based on observable data; in other words, in accordance with level 2 in the measurement hierarchy established in IFRS 13. The fair value of forward exchange contracts is calculated by discounting the difference between the agreed forward rate and the forward rate that can be obtained on the closing date for the remaining contract term. Contracts are discounted to a risk-free rate based on government bonds.

22. RELATED PARTY DISCLOSURES
Ramsbury Invest AB, which is owned by Stefan Persson and family, is the parent company of H & M Hennes & Mauritz AB. The H&M group leases the following store premises in properties directly or indirectly owned by Stefan Persson and family: Drottninggatan 50–52 and Drottninggatan 56 in Stockholm, Kungsårgatan 55 in Gothenburg, Stadt Hamburgsgatan 9 in Malmö, Amagertorv 23 in Copenhagen, Oxford Circus and Regent Street in London, Kaufinger Strasse in Munich, Via del Corso/Via Tomacelli in Rome and, since January 2008, premises for H&M’s head office in Stockholm. Rent is paid at market rates, and rental costs and other property-related expenses totalled SEK 466 m (436) for the financial year.

Karl-Johan Persson received remuneration in the form of salary and benefits amounting to SEK 13.4 m (15.0), which included variable remuneration of SEK 0 m (2.0), for work carried out during the 2016 financial year as CEO of H & M Hennes & Mauritz AB.

Outstanding balances with related parties as of 30 November 2016 totalled SEK 3.1 m (0.7).

27. Contingent Liabilities

A contingent liability is reported where there is a possible obligation for which it remains to be confirmed whether the company has an existing obligation that could result in an outflow of resources. Alternatively, there may be an existing obligation that does not fulfil the criteria for reporting in the balance sheet as a provision or other liability since it is not likely that an outflow of financial resources will be required in order to settle the obligation or the amount cannot be reliably estimated.

The group is involved in various types of disputes, but it is assessed that no current disputes will have any significant impact on the group’s results. For further information concerning tax disputes see note 10.

Neither the group nor the parent company has any pledged assets.

28. Interest Income and Similar Items

The parent company’s interest income and similar items consists of SEK 21 m (45) in interest income and SEK 132 m (109) in translation effects on receivables and liabilities from group companies.

29. Key Ratio Definitions

This report contains key financial ratios in accordance with the framework for financial reporting applied by the H&M group, which is based on IFRS. Other key ratios and indicators are also used to follow up, analyse and govern the business and to provide the H&M group’s stakeholders with financial information concerning the group’s financial position, results and performance in a consistent way.

These other key ratios and indicators are considered necessary in order to be able to monitor performance against the group’s financial targets. A combination of continual growth, high profitability, stable cash flow and using capital in the right way is intended to generate a high overall return for the H&M group’s shareholders. It is therefore relevant to present key ratios relating to growth, profitability and capital, share-based measurements and terms relating to capital on a continuous basis.

The key ratios and indicators used, referred to and presented in the reporting are defined as shown in the list below.

Growth measurement

Change in sales, %, local currency: The group’s total change in sales in local currency is calculated as the period’s net sales (calculated at the same average rate as was used for the same period in the previous year) minus the period’s net sales in the previous year, as a percentage of the period’s net sales in the previous year.

Profit and yield measurements

Return on equity: Profit for the year in relation to average shareholders’ equity.

Return on capital employed: Profit after financial items plus interest expense in relation to average shareholders’ equity plus average interest-bearing liabilities.

Gross profit: Net sales minus cost of goods sold.

Gross margin: Gross profit in relation to net sales.

Operating profit: Net sales minus all costs attributable to operations but excluding net financial items and income tax.

Operating margin: Operating profit as a percentage of net sales for the year.

Capital measurements

Share of risk-bearing capital, %: Shareholders’ equity plus deferred tax liability in relation to the balance sheet total.

Equity/assets ratio: Shareholders’ equity in relation to the balance sheet total.

Capital employed: Shareholders’ equity plus interest-bearing liabilities.

Share-related measurements

Equity per share: Shareholders’ equity divided by the number of shares.

Cash flow from operating activities per share: Cash flow from operating activities for the period divided by the average number of shares during the period.

Earnings per share: Net profit for the period in relation to the number of shares during the period.

P/E ratio: Price per share divided by earnings per share.
The undersigned hereby provide an assurance that the annual report and consolidated accounts have been drawn up in accordance with IFRS international accounting standards, as adopted by the EU, with good accounting practice, and that they provide a true and fair view of the group's and the parent company's position and earnings, and also that the administration report provides a true and fair view of the development of the group's and the parent company's business, position and earnings, and also describe the significant risks and uncertainties faced by the companies making up the group.

Authorised Public Accountant
REPORT ON THE ANNUAL ACCOUNTS AND CONSOLIDATED ACCOUNTS

To the Annual General Meeting of H & M Hennes & Mauritz AB (publ), corporate identity number 556042-7220

We have audited the annual accounts and consolidated accounts of H & M Hennes & Mauritz AB for the financial year 1 December 2015 to 30 November 2016. The company’s annual accounts and consolidated accounts can be found on pages 72–102 of the printed version of this document.

Responsibilities of the Board of Directors and the Chief Executive Officer for the annual accounts and consolidated accounts

The Board of Directors and the Chief Executive Officer are responsible for the preparation and fair presentation of these annual accounts and consolidated accounts in accordance with International Financial Reporting Standards, as adopted by the EU, and the Annual Accounts Act, and for such internal control as the Board of Directors and the Chief Executive Officer determine is necessary to enable the preparation of annual accounts and consolidated accounts that are free from material misstatement, whether due to fraud or error.

Auditor’s responsibility

Our responsibility is to express an opinion on the annual accounts and the consolidated accounts based on our audit. We conducted our audit in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance that the annual accounts and consolidated accounts are free from material misstatement.

An audit involves performing procedures to obtain audit evidence supporting the amounts and disclosures in the annual accounts and consolidated accounts. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the annual accounts and consolidated accounts, whether due to fraud or error. In making those risk assessments, the auditor considers the aspects of internal control that are relevant to the company’s preparation and fair presentation of the annual accounts and consolidated accounts in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Directors and the Chief Executive Officer, as well as evaluating the overall presentation of the annual accounts and consolidated accounts.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the annual accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the parent company as of 30 November 2016 and of its financial performance and cash flows for the year in accordance with the Annual Accounts Act, and the consolidated accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the group as of 30 November 2016 and of its financial performance and cash flows for the year in accordance with International Financial Reporting Standards, as adopted by the EU, and the Annual Accounts Act. The administration report is consistent with the other parts of the annual accounts and consolidated accounts.

We therefore recommend that the Annual General Meeting adopts the income statement and balance sheet for the parent company and the group.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

In addition to our audit of the annual accounts and consolidated accounts, we have examined the proposed appropriations of the company’s profit or loss and the administration of the Board of Directors and the Chief Executive Officer of H & M Hennes & Mauritz AB for the financial year from 1 December 2015 to 30 November 2016.

Responsibilities of the Board of Directors and the Chief Executive Officer

The Board of Directors is responsible for the proposal for appropriations of the company’s profit or loss, and the Board of Directors and the Chief Executive Officer are responsible for administration under the Companies Act.

Auditor’s responsibility

Our responsibility is to express an opinion with reasonable assurance on the proposed appropriations of the company’s profit or loss and on the administration based on our audit. We conducted the audit in accordance with generally accepted auditing standards in Sweden.

As a basis for our opinion on the Board of Directors’ proposed appropriations of the company’s profit or loss, we examined the Board of Directors’ reasoned statement and a selection of supporting evidence in order to be able to assess whether the proposal is in accordance with the Companies Act.

As a basis for our opinion concerning discharge from liability, in addition to our audit of the annual accounts and consolidated accounts we examined significant decisions, actions taken and circumstances of the company in order to determine whether any member of the Board of Directors or the Chief Executive Officer has any liability to the company. We also examined whether any member of the Board of Directors or the Chief Executive Officer has, in any other way, acted in contravention of the Companies Act, the Annual Accounts Act or the Articles of Association.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

We recommend to the Annual General Meeting that the profit be appropriated in accordance with the proposal in the administration report and that the members of the Board of Directors and the Chief Executive Officer be discharged from liability for the financial year.

The H&M group through the years

In 1947 Erling Persson opened the store Hennes in Västerås, Sweden. Today the H&M group is a global fashion company with several clearly defined fashion brands that together inspire customers around the world to dress their own personal style.

1947
H&M’s story begins when founder Erling Persson opens the first store in Västerås, Sweden, selling women’s clothing. The store is called Hennes.

1964
The first store outside Sweden opens in Norway.

1968
The name is changed to Hennes & Mauritz when Erling Persson buys the hunting and fishing store Mauritz Widforss in Stockholm, including a stock of men’s clothing. This is the start of sales of men’s and children’s clothing.

1974
H&M is listed on the Stockholm Stock Exchange.

1976
The first store outside Scandinavia opens in London.

1980–1999
Global expansion takes off with new markets such as Germany, the Netherlands, Belgium, Austria, Luxembourg, Finland and France.

2000
The first H&M stores in the US and Spain open. In subsequent years H&M opens in more European markets.

2004
H&M’s designer collaborations start with Karl Lagerfeld, to be followed by collaborations with some of the world’s biggest designers and fashion icons.
2006
Major expansion of online shopping at hm.com begins in Europe. The first franchise stores open, in the Middle East.

2007–2009
The H&M Foundation is established in 2007 as a non-profit global foundation. The first H&M stores in East Asia open in Hong Kong, Shanghai and Tokyo. New brands are added: COS is launched in 2007, while in 2008 H&M acquires fashion company FabriScandinavien AB and with it the brands Cheap Monday, Monki and Weekday. H&M Home is launched in 2009.

2010
The first H&M Conscious Collection is launched, made with sustainable materials such as organic cotton and recycled polyester. Store number 2,000 opens in Osaka, Japan.

2011
The H&M Incentive Program (HIP) for all employees is started with a gift of around SEK 1 billion, invested in H&M shares, from Stefan Persson and family. HIP works the same way for everyone in the H&M group – regardless of salary, role, country and whether full- or part-time.

2013
Launch of fashion brand & Other Stories. H&M opens its online store in the US. The H&M group’s 3,000th store opens in Chengdu, China while the first H&M stores in the southern hemisphere open in Chile and Indonesia. H&M starts the Garment Collecting initiative, with the aim of closing the loop for textiles – becoming the first fashion company to collect old textiles in stores globally for reuse and recycling.

2014
Launch of the first denim garments made using recycled fibres from H&M’s Garment Collecting, Australia and the Philippines become new H&M markets, while the online store opens in four new countries including China. The new H&M Sport is launched and H&M’s shoe concept is extended and updated.

2015
Five new H&M markets are added, including India and South Africa. The online store opens in another ten countries. Launch of the new H&M Beauty concept. The H&M Foundation announces the Global Change Award, supporting and encouraging innovation for a more circular fashion industry.

2016
Nearly 70 years on, the H&M group continues to grow with a passion for fashion, quality and sustainability. The first H&M stores open in Puerto Rico, Cyprus and New Zealand, and the online store opens in a further 11 countries. Together the brands of the H&M group pass the milestone of 4,000 stores worldwide.
Annual general meeting

TIME AND PLACE
The 2017 annual general meeting will be held at 3 p.m. on Wednesday 10 May 2017 in the Erling Persson Hall, Aula Medica, Karolinska Institutet, Solna.

Shareholders who are registered in the share register printout as of Thursday 4 May 2017 and give notice of their intention to attend the AGM no later than Thursday 4 May 2017 will be entitled to participate in the AGM.

Shareholders whose shares are registered in the name of a nominee must re-register their shares in their own name in order to be entitled to participate in the AGM. In order to re-register shares in time, shareholders should request temporary owner registration, which is referred to as voting right registration, well in advance of 4 May 2017.

NOTICE OF ATTENDANCE
Shareholders must provide notice of their intention to participate in the AGM by post, fax, telephone or via H&M’s website to:

H & M Hennes & Mauritz AB
Årstämman/Annual General Meeting
